ABSTRACTS SUBJECT INDEX TO VOLUME 119

ABDOMEN, Blunt trauma of, 179; closed injuries of, 179; congenital absence of musculature of, 417; repair of defects after partial resection of wall of, 417; disc infections and pain in, 695; abdominal angina treated by direct arterial reimplantation on aorta, 916; actinomycosis of, 1153; sympathicoblastomas, 1153; treatment in sympathetic neuroblastoma in children, 1154; abdominal and genital cancers in infants, 1157

Abnormalities and deformities, Spina bifida cystica, 159; congenital abnormalities of aortic arch, 174; congenital aortic stenosis syndrome in infancy, 175; absence of pulmonary valve in tetralogy of Fallot, 176; surgical management of duplications of alimentary tract, 181; primary dilatation of ureter in adult, 204; familial osteoectasia with macrocranium, 209; pathologic anatomy of tetralogy of Fallot and its variations, 413; congenital absence of abdominal musculature, 417; imperforate anus, 427; operative treatment of monstrous sinciputoceles, 629; congenital anomalies probably induced by cyclophosphamide, 681; congenital angiodysplasias of extremities, 960; ear deformities in thalidomide embryopathy, 1361; congenital partial absence of tarsal plates, 1368; congenital anomalies of limbs, 1407; congenital universal insensitivity to pain, 1423

Abortion, Endotoxic shock with septic, 676; fatalities associated with, 680; therapeutic, and sterilization in diabetic patients, 935; hyperlacticacidemia in patients with septic, 1396

Abscess, Of liver, 188; otogenic brain, 397; surgery of liver, 670; nonspecific, of lung, 1145; prostatic, 1183; subphrenic, 1208; definitive treatment of pilonidal, 1367; subphrenic, 1377

Actinomycosis, Of brain, 397

Adhesions, Prevention of experimental peritoneal, by dextran, 417

Adrenal gland, Congenital hyperplasia of, 206

Adrenal gland, neoplasms, Tumors of kidneys and, in adults, 203; test for pheochromocytoma, 1186, 1406

Amebiasis, Amebic balanitis, 443

Amputation, Gritti-Strokes, for obliterative arterial disease associated with gangrene, 693; new type of forefoot, 697; trial of conservative, for lesions of feet in diabetes mellitus, 956; lower extremity, and appropriate prostheses, 1193

Anemia, Associated with diaphragmatic hernias, 178; aplastic, in pregnancy, 1178

Anesthesia, Local, for hernioplasty, 180; hemodynamics and blood volume during operation with ether, and unreplaced blood loss, 229; and reanimation problems, 229; oxygen uptake during, before and after total body perfusion, 464; pronethalol in treatment of ventricular arrhythmias during, 465; and its immediate postoperative complications, 466; corticosteroid concentration in plasma during, and at operation, 469; cerebral circulation of man during halothane, 712; postoperative hepatic necrosis, 712; mortality due to, in tonsillectomy and adenoidectomy, 712; narcodorm and brietal, 713; respiratory effects of general, 713; neuromuscular blockage by intravenous injection of streptomycin sulfate in man, 714; comparison of anesthetic methods in elective surgery, 714; evolution of, for neurosurgery, 967; reanesthetizing patients undergoing tonsillectomy and adenoidectomy because of persistent postoperative hemorrhage, 967; clinical effectiveness of drugs used for topical, 968; bronchopleural fistula management during, 968; morphologic changes in hepatic necrosis following halothane, in man, 968; preventing aspiration deaths during, 969; transaminase studies following, 969; specialty of anesthesiology, 969; general, for very aged, 970; peridural, 1209; for cleft lip and palate surgery, 1210; intravenous regional, in hand surgery, 1210; factors affecting termination of curarization in human subject, 1417

Aneurysms, Intrafrontal arteriovenous, vascularized by anterior ethmoidal artery, 155; intradural arteriovenous, of posterior fossa, 155; circulatory arrest under deep hypothermia and extracorporeal circulation in treatment of intracranial, 156; coating and reinforcement of intracranial, with synthetic resins and rubbers, 156; congenital, of sinuses of Valsalva, 173; of left ventricle due to myocardial infarction, 173; traumatic, of thoracic aorta, 220; ocular signs and symptoms in cerebral, 397; of thoracic aorta, 457; of caudal gluteal artery as complication after intragluteal injection, 458; angiographic identification of ruptured lesion in patients with multiple cerebral, 637; multiple intracranial, 638; plastic coating of intracranial, with "EDH-adhesive," 638; of extracranial internal carotid, 701; differentiation of, from infundibulum of posterior communicating artery, 715; intracranial, 899; natural history of anterior communicating, 899; dissecting, of thoracic aorta, 958; cryptogenic mycotic, 958; of posterior cerebral artery, 1133; combined stereotactic operation for treatment of deep-seated angiomas and, 1137; aortic, 1197; surgical management of dissecting, involving ascending aorta, 1197; excision and replacement of entire thoracic aorta for, 1198; arteriosclerotic, of popliteal artery, 1199; pneumographic syndrome of basilar, 1211; demonstration of substances capable of contracting smooth muscle in hematoma fluid from certain cases of ruptured cerebral, 1365; resection of hepatic arterial, following intraperitoneal rupture, 1387

Ankle, Malleolar fractures, 215; lateral ligament sprains of, 1193

Antibiotics, Intestinal asepsis with neomycin and framycetin, 185; various courses of osteomyelitis, 209; use of staphylomycine in neurosurgery, 227; infected mastoid in era of, 392; treatment of acute cerebrocranial trauma by intracarotid administration of penicillin, 396; mimicry of acute cholecystitis by erythromycin estolate reactions, 428; effectiveness of ampicillin against gram-negative bacteria, 462; preoperative and postoperative therapy with, in surgery of colon, 1166; changes in course of osteomyelitis in babies since introduction of therapy with, 1187; penicilloyl-polylysine as intradermal test of penicillin sensitivity, 1416

Anticoagulants, Spontaneous intracranial hematomas in patients receiving, 156; medical management of cerebrovascular diseases, 220; superiority of heparin over prothrombin depressants in treatment of thrombophlebitis and its sequelae, 223; therapy with, 224; use of heparin, 1196

Anus, Imperforate, 427; epidermoid carcinoma of perianal skin and anal canal, 670; treatment of fissure-in-ano, 925

Aorta, Congenital abnormalities of arch of, 174; surgical treatment of coarctation of, in older people with or without associated anomalies of heart and great vessels, 174; kinking and buckling of thoracic, simulating mediastinal tumors, 220; traumatic aneurysm of thoracic, 220; transfemoral embolectomy for embolic occlusion of abdominal, and iliac arteries, 222; aortic arch syndrome, 232; complications in repair of coarctation of, 411; syphilitic aortitis, 456; surgical treatment of acute traumatic rupture of thoracic, 456; aneurysms of thoracic, 457; renal factor in hypertension due to coarctation of, 702; abdominal angina treated by direct arterial reimplantation of, 916; dissecting aneurysms of thoracic, 958; survival and complications in surgically treated aortoiliac thrombosis, 959; aneurysms of, 1197; acute traumatic rupture of thoracic, 1197; surgical management of dissecting aneurysms involving ascending, 1197; excision and replacement of entire thoracic, for aneurysm, 1198; grafts of abdominal, 1198; congenital coarctation of abdominal, 1198; acute traumatic rupture of thoracic, 1411

Appendix, Inflammation of, and gravidopuerperal state, 196; immediate complications following appendectomy, 423; acute appendicitis in pregnancy and labor, 437; incidental appendectomy with regional enteritis, 665; carcinoid tumors of, in childhood, 667; acute appendicitis, 668; current mortality in appendicitis, 668; in relation to neoplastic disease, 1162; appendectomies, 1162; appendectomy wound infection, drainage, and antibiotics, 1163; appendicitis and pregnancy, 1177

Arm, Complete fracture of eminentia capitata humeri, 210

Arteries, Survival of, in experimental full thickness skin autografts, 402; extracranial vascular occlusive disease, 456; prosthesis of heterologous vascular origin, 457; fibromuscular hyperplasia in extrarenal, 457; aging and collateral peripheral, 459; persistent trigeminal, 637; Gritti-Strokes amputation for obliterative disease of, associated with gangrene, 693; importance of porosity in prosthesis for, 702; treatment of arteritides of lower extremities, 704; thromboangiitis obliterans, 704; possibilities and limitations of repeat restorative surgery of, in secondary and late failures, 705; role of sympathectomy in treatment of obliterative peripheral vascular disease, 904; surgical treatment of pulseless (Takayasu's) disease, 959; primary obliterating arteritis and gastric ulcers, 1157; arteriosclerotic aneurysms of popliteal, 1199; case for conservatism in claudication, 1200; pneumographic syndrome of basilar aneurysm, 1211; safe, routine peripheral angiography in large city hospital, 1213

Arteries, carotid, Anastomosis of common and intracranial, or middle cerebral artery, 155; angiographic diagnosis of occlusion of supraclinoid portion of internal, 456; radiologic and pathologic study of embolism of internal carotid-middle cerebral arterial axis, 638; intracranial hemorrhage following surgical revascularization for treatment of acute strokes, 701; aneurysms of extracranial internal, 701; new method of diagnosing diseases of, 957; further considerations on Bernasconi and Cassinari's artery and other meningeal rami of internal, 972; carotid-cavernous fistula with contralateral exophthalmos, 1133; prophylactic endarterectomy of, 1196; recognition of superior insular sulcus on angiogram of lateral, 1365; kinked internal, 1411

Arteries, cerebral, Results of endarterectomy in treatment of cerebrovascular disease, 220; radiologic and pathologic study of embolism of internal carotid-middle cerebral arterial axis, 638; new concept in therapy of insufficiency of, 638; anatomy of middle, 1133; angiography of, 1133; aneurysms of posterior, 1133; angiography of, in infant, 1364; unusual vascular malformations and value of arteriography of, in patients with mass lesions, 1364

Arteries, coronary, Aberrant left, 172; anomalous left, originating from pulmonary, 411; methods, indications, and results of angiography of, 467; obstruction of, 1148

Arteries, femoral, Transfemoral embolectomy for embolic occlusion of abdominal aorta and iliac, 222; obliterative disease of lower limbs studied by means of repeated femoral arteriography, 222; radiologic aspects of bones and joints in arteritis of lower limbs, 222; high lumbar sympathectomy in obstructive diseases of, of lower limbs, 399; management of late failure of reconstruction of lower extremity, 705; arterial homograft used as "bypass" in patients with femoropopliteal arteriosclerotic obstruction, 958; occlusive disease of lower extremities in patients 16 to 37 years of age, 960; venous autografts in femoropopliteal arterioplasty, 1199; femoropopliteal endarterectomy, 1412

Arteries, hepatic, Arteriography of, in diagnosis of tumors of liver, 717; lesions of, 958; accidental ligation of, in humans, 1168; resection of aneurysm of, following intraperitoneal rupture, 1387

Arteries, mesenteric, Patterns of inferior, 458; embolectomy of superior, 703; nonspecific enteritis resulting from insufficiency of, 959; insufficiency of, complicating repair of aortic regurgitation, 1199; diagnosis and therapy of occlusion of, 1384

Arteries, pulmonary, Stenotic lesions of, 406; peripheral pulmonic stenosis, 407; congenital stenosis of branches of, 701

Arteries, renal, Diagnosis of hypertension caused by unilateral disease of, 202; surgical management of renal hypertension, 221, 221; lesions of, 221; stenosis of, without renal ischemia, 222; renal arteriography, separate renal function studies, and renal biopsy in human hypertension, 445; transureteral hydrostatic pressures and pulse of, 445; complicated stenosis of, 702; diagnosis and treatment of arterial renal hypertension, 1185; stenosis of, 1404; percutaneous noncatheter left brachial renal arteriography, 1420

Arteries, subclavian, Subclavian steal syndrome, 219; compression of, as cause of ischemic brachial neuropathy, 455; surgical management of insufficiency of vertebral and, 455

Arteries, vertebral, Retrograde blood flow in, 219; surgical management of insufficiency of subclavian and, 455; angiography of, by percutaneous puncture of axillary artery, 1419; arteriograms of, performed by subclavian subclavicular route, 1419

Arthritis, Atlantoaxial vertebral dislocation as complication of chronic rheumatoid, 212; arthroplasty of elbow in rheumatoid, 949; decompression operation in hip, 1189

Ascites, Permanent drainage of, 427; cytologic diagnosis of ascitic fluid, 1153; prognosis after surgical treatment of, 1386

Asepsis, antisepsis, and antiseptics, Appraisal of skin antiseptics and attempted correlation with wound infection, 228; comparison of antiseptic value of certain surgical scrub-up preparations, 463; asepsis in operating theater, 464; bacterial flora of clean wounds and its relation to subsequent sepsis, 710; application of technology of germ free laboratory to special problems of patient care, 710; effect of povidone-iodine (bentadine) on serum protein bound iodine, when used as surgical preparation on intact skin, 1209

Atherosclerosis, Gastric ulcer in aged and calcified, 420

Bile duct, Atresia of extrahepatic, 188; injuries to, 430; benign, nontraumatic strictures of extrahepatic, 431;

resistance to flow through common, in man, 671; therapy of choledochus cysts, 672; biliary decompression without other external drainage in treatment of liver injuries, 673; choledochal cyst, 926; operative procedure for benign stricture of, 927; transhepatic cholangiography, 1169; percutaneous transhepatic cholangiography, 1169; operative cholangiography as aid in reducing incidence of "overlooked" stones in common, 1169; strictures of extrahepatic, 1171; early complications following surgery of extrahepatic, 1172; spontaneous regression of primary carcinoma of, 1217; atresia of hepatic, 1387; primary sclerosing cholangitis of extrahepatic, 1388; morphology of sphincter of Oddi area, 1389

Biliary tract, Spiral type junction of cystic and common hepatic ducts investigated by operative cholangiography, 188; role of drainage following surgery of, 188; effects of vagal nerve section on, 429; congenital biliary hypoplasia, 429; complications of surgery of, 430; importance of coexistent factors in surgery of, 430; hepaticojejunostomy and choledochojejunostomy, 670; hepaticojejunostomy with transhepatic intubation, 671; retrograde injection of Wirsung's duct during preoperative cholangiography, 672; etiology of disease of, in southwestern American Indians, 672; sphincterotomy of sphincter of Oddi in disease of, 672; congenital biliary atresia, 672, 926; operative results in intrahepatic cholestasis, 1170; biochemical observations on biliary fistulas, 1170; disappearance of demonstrated gallstones, 1170; mortality from cholelithiasis, 1171; percutaneous transhepatic cholangiography in jaundiced patient, 1387; traumatic hemobilia, 1388

Biopsy, Needle, of peritoneum, 179; Baker-Hughes multiple retrieving tube for gastrointestinal, 182; transrectal needle, as office procedure, 186; endometrial, 191; transcervical technique for removal of specimen from superior sulcus tumor for pathologic study, 405; of scalene lymph nodes and right thoracic duct lymph node for diagnosis of pulmonary disease, 648; simplified capsule for gastrointestinal, 920; aspiration, of cervical spine, 946; suction, in chronic gastritis, 973; open lung, in diffuse pulmonary disease, 1146; pancreatic, 1172; open lung, 1373; of liver in infants and children, 1387

Bladder, Artificial electrical stimulator for paralyzed human, 205; obstruction of neck of, in childhood, 205; obstruction of neck of, 206; association of valves in posterior urethra with obstruction of neck of, 206; tubeless cystostomy, 446; evacuation of, in paraplegic dogs by direct electric stimulation, 446; radical cystectomy after supervoltage radiotherapy, 447; stenotic meatus in children, 448; obstruction of, 448; formation of, by plastic shell after total cystectomy, 688; dysfunction of, in nontraumatic paraplegia, 689; obstruction of neck of, in children, 1186; choice of contrast medium in double contrast studies of, 1212; use of intestinal loop for reconstructive surgery of, 1405

Bladder, neoplasms, Papillary tumors of, 688; carcinoma of, 689

Blood, Polycythemia vera, 219; new plasma expander, 224; amniotic fluid analysis in prenatal diagnosis of erythroblastosis fetalis, 439; amniotic bilirubin in prognosis and treatment of fetal erythroblastosis by antirhesus immunization, 439; disorders of coagulation associated with surgery of prostate, 443; role of thrombocytopenia in hemorrhages of cirrhosis of liver, 671; relation of coagulation factor defects to loss of, during surgery, 1201; surgical bleeding in polycythemia vera, 1202; electrical hemostasis, 1202; hypofibrinogenemia and intrauterine fetal death, 1397; hemostatic role of preoperative intravenous oxytocin in repeat cesarean section, 1399; stress and multiple factor cause of bleeding, 1412

Blood, circulation, Circulatory effects of chronic pulmonary emphysema, 167; retrograde vertebral artery, 219; peripheral flow in intermittent claudication, 222; studies on peripheral blood and lymph flow utilizing radioactive isotopes, 459; venous return from lower leg in health and in chronic venous insufficiency, 459; early circulation in split skin grafts, 641; cerebral circulation of man during halothane anesthesia, 712; estimation of segmental hepatic venous flow in man, 925; peripheral vascular system, 1195; roentgenologic determination of cerebral circulation time in augmented intracranial pressure, 1364; respiratory and circulatory function of patients with bronchogenic carcinoma, 1373

Blood, circulation, extracorporeal, Assisted circulation, 172; renal function in acquired valvular heart disease and effects of, 201; results of open heart surgery by simplified technique, 229; total body perfusion in cardiac operations, 229; experimental application of hypothermia and, 464; oxygen uptake during anesthesia in patients before and after total body perfusion, 464; isolated artificial cerebral circulation combined with general moderate hypothermia for open heart surgery, 465; total prime of disk oxygenator with Ringer's and Ringer's lactate solution for cardiopulmonary bypass, 465; prolonged cardiopulmonary bypass, 711; automatic pressure-controlled coronary perfusion system, 967; influence of, combined with hypothermia on thrombocytes, 966; clinical and physiologic results of perfusion with diluted blood, 966; blood pump unit for use in, 1209; loss and requirement of blood in connection with operations utilizing, 1417

Blood, groups, Renal homografts in patients with major donor-recipient blood group incompatibilities, 445; posttransfusional antierythrocyte, antileukocyte, and antiplatelet isoimmunization in obstetrics and gynecology, 933; phenomena of autoimmunization in thyroid disease, 1129; placenta in anti-Rh isoimmunization, 1179; placental lesion to account for fetal hemorrhage into maternal circulation, 1180; fetal transfusion in utero, 1180; and cancer, 1216; fallacies in prediction of severity of hemolytic disease of newborn in patients with rhesus isoimmunization, 1397

Blood, transfusion, During cesarean section, 197; detection and correction of bleeding tendencies in surgical patient, 223; propiolactone plus ultraviolet-treated plasma without hepatitis, 706; transfusion of human corpse, without additives, 962; frozen glycerolized, 1203; risk of posttransfusion viral hepatitis, 1412

Blood pressure, high, Radioisotopic renal function studies and surgical findings in hypertensive patients, 201; diagnosis of, caused by unilateral renal artery disease, 202; segmental renal ischemia in cause of, 202; surgical management of renal, 221, 221; lesions of renal artery, 221; renal arteriography, separate renal function studies, and renal biopsy in human, 445; transureteral hydrostatic pressures and renal arterial pulse, 445; kidney function after renal revascularization for, 687; renal factor in, due to coarctation of aorta, 702; as related to renal ischemia, 941; diagnosis and treatment of arterial renal, 1185; application of renal angiography in, 1420

Blood vessels, Morphologic variations of sphenosylvian arch in certain expanding or traumatic intracranial lesions, 154; panarteriography of intracranial and extracranial, 154; comparison of ultrasoft roentgen rays to histochemical methods for detection of calcium in wall of, 219; arteriotomy patches of autogenous and venous tissue, 219; compression of subclavian artery as cause of ischemic brachial neuropathy, 455;

treatment of combined aortoiliac and femoropopliteal occlusive disease by splenofemoral and axillofemoral bypass grafts, 458; Raynaud's phenomenon in users of chain saws, 458; pulmonary angiography in diagnosis of thromboembolic disease, 701; injury of superior mesenteric, secondary to nonpenetrating abdominal trauma, 703; laterolateral mesentericocaval anastomosis, 703; practical long-film serialography, 716; femoral arteriography, 717; congenital angiodysplasias of extremities, 960; simplified stapling apparatus for automatic suturing of small, 970; behavior of, after experimental transplantation of bone, 977; place of soft tissue arteriography, 1195; evaluation of tortuosity of extracranial, 1195; traumatic arteriovenous fistulas involving middle meningeal, 1195; fabric vascular prostheses, 1195; management of aortoiliac reconstruction complicated by sepsis and hemorrhage, 1197; diabetic microangiopathy in human toes with emphasis on ultrastructural change in dermal capillaries, 1200; juxtaepiphysial, in long bones of fetal rats, 1215; false aneurysm, 1411; autogenous veins as arterial substitutes, 1411

Blood volume, Hemodynamics and, during operation with ether anesthesia and unreplaced blood loss, 229; studies of, in normal pregnancy, toxemia, and gynecologic patients, 678; methodology of determination of, 963; preoperative, 1204; management of, in surgical patients, 1413; response of, to open heart surgery, 1416; loss and requirement of blood in connection with operations utilizing extracorporeal circulation, 1417

Bone, Diabetic arthropathy, 207; skeletal manifestations in Marfan's syndrome, 208; familial osteoectasia with macrocranium, 209; variations of tarsal, 216; radiologic aspects of, in arteritis of lower limbs, 222; diagnosis of metastasis of, by photoscanning with strontium-85, 449; fibrous lesions of, in childhood, 691; burns involving, 708; treatment of infected diaphysial pseudarthroses in long, 945; production of, in nonosteogenic fibroma, 945; hydatid disease of, in Australia, 945; grafting of ununited fractures, 946; behavior of blood vessels after experimental transplantation of, 977; electrophoretic studies on reaction of, to metals used in internal fixation, 1187; mycotic infections of, 1187; surgery of, by means of roentgen television, 1213; repair of experimental defects in rabbit skulls, 1215

Bone, neoplasms, Benign osteoblastoma, 207; value of radiotherapy in management of osteoclastoma, 207; malignant synovioma, 208; giant cell tumor of clavicle, 210; long term survival of patients with myeloma of vertebral column, 212; sacrococcygeal teratoma in adult, 213; identification of neoplastic cells by multiple puncture of, 691; osteogenic sarcoma, 692; osteoid osteoma, 693; osteosarcoma, 946; osteoplastic approach to frontal sinus for osteoma, 1127

Bone marrow, Estimation in vivo of viability of frozen and stored, 460

Brain, Diagnostic significance of Foster-Kennedy syndrome, 153; injuries of nerves and, in children and adolescents, 153; pseudotumor cerebri, 153; panarteriography of intracranial and extracranial vessels, 154; morphologic variations of sphenosylvian arch in certain expanding or traumatic intracranial lesions, 154; circulatory arrest under deep hypothermia and extracorporeal circulation in treatment of intracranial aneurysms, 156; coating and reinforcement of intracranial aneurysm with synthetic resins and rubbers, 156; positive contrast ventriculography, 231; intracranial complications of penetrating orbital injuries, 390; rheoencephalography in control subjects and in proved cases of cerebrovascular disease, 395; radiologic method of following changes and displacements of, after surgery, 395; ultrasound in diagnosis of intracranial lesions, 395; investigation of 2 cases of Cushing's disease with pituitary adenoma by means of test utilizing posterior pituitary extract during dexamethasone suppression, 395; separation of cranioencephalogus twins, 396; treatment of acute cerebrocranial trauma by intracarotid administration of penicillin, 396; ocular signs and symptoms in cerebral aneurysms, 397; actinomycosis of, 397; otogenic abscess of, 397; persistent trigeminal artery (carotid-basilar anastomosis), 637; cerebral angiographic observations after experimental head trauma, 637; angiographic identification of ruptured lesion in patients with multiple cerebral aneurysms, 637; multiple intracranial aneurysms, 638; plastic coating of intracranial aneurysms with "EDH-adhesive," 638; intracranial aneurysms, 899; heart disease as cause of cerebral circulatory disturbances, 899; oral glycerol for reduction of intracranial pressure, 900; causes of shock with head injury, 900; surgical separation of 2 pairs of craniopagus twins, 901; agenesis of septum pellucidum, 972; intracarotid sodium amytal for lateralization of cerebral speech dominance, 1133; clinical comparison of 2 agents used in scanning of, 1134; primary spontaneous cerebrospinal fluid rhinorrhea, 1135; roentgenologic determination of cerebral circulation time in augmented intracranial pressure, 1364; studies of passage of water, electrolytes, and proteins into cerebrospinal fluid in human, 1423

Brain, neoplasms, Pneumoencephalographic features of lesions of corpus callosum and septum pellucidum, 153; tumors of posterior fossa in childhood and adolescence, 154; scintillation scanning of tumors of, 157; tumors affecting central nervous system, 157; nystagmographic findings in tumors of cerebellopontine angle, 159; chemotherapy of tumors of, by continuous arterial infusion, 900; frequency of metastatic lesions of, in relation to age, 900; medulloblastoma in adults, 901; intracranial tumors of first 2 years of life, 1134; metastatic tumors of, 1135; cranial chordoma, 1135; surgical removal of teratoma of pineal region, 1136; iodoventriculography in tumors of posterior fossa, 1211; radiologic diagnosis of expansion process of moderate volume in region of trigone, 1211; iodoventriculography by direct catheterization of third ventricle in posterior fossa lesions of childhood, 1364; unusual vascular malformations and value of cerebral arteriography in patients with mass lesions, 1364; treatment of malignant gliomas, 1366; postoperative course of cerebral metastases, 1366

Breast, Mammography for problem, 403; thermography of, 403; value of contrast medium injection in locating lesions of, causing discharge, 643; augmentation mammaplasty using inframammary dermal fat grafts, 906; mammography in diagnosis of diseases of, 1141; calcification in disease of, 1141; causes of patients' delay in diseases of, 1141

Breast, neoplasms, Bimodal age distribution of patients with mammary carcinoma as evidence for existence of 2 types of cancer of human, 166; attempted total hypophysectomy in advanced cancer of, 398; selection of treatment for primary cancer of, 403; early cancer of, 403; complications in postoperative irradiation of carcinoma of, 404; postoperative complications of radical mastectomy, 404; radiology in diagnosis of carcinoma of, 643; inflammatory carcinoma of, 644; cystosarcoma phyllodes, 644; carcinoma of, and pregnancy, 644; early spread of carcinoma of, and its bearing on operative treatment, 644; combined irradiation and surgical treatment in carcinoma of, 645; assessment of radical mastectomy and

postoperative irradiation therapy in treatment of cancer of, 645; place of radiotherapy in management of early cancer of, 645; rapid palliative irradiation of inoperable cancer of, 645; meaning of 5 year cure in cancer of, 646; surgical excision of internal mammary nodes for cancer of, 646; role of castration in cancer of, 906; cancer of male, 906; intrahypophysial implantation of radioactive yttrium for treatment of advanced cancer of, 1136; cancer of, in ninth and tenth decades, 1142; natural history of untreated cancer of, 1142; relation between urinary 17-hydroxycorticosteroids and 11-desoxy-17-oxosteroids and fate of patients after mastectomy, 1142; mammography as routine screening examination for detecting cancer of, 1368; significance of Barr's cell nuclear bodies in carcinoma of female, 1369; radical treatment in cancer of, 1369; lymphatic circulation of upper extremity after radical operation for cancer of, and its relation to secondary edema of arm, 1369; cortisone in palliative treatment of cancer of, 1370

Bronchus, Interbronchial anastomoses, 168; tracheobronchial compression by congenital cardiovascular anomalies in children, 169; barium sulfate as contrast agent for bronchography in infants and children, 232; expiratory stenosis of trachea and large, resulting from hypotonia of pars membranacea in obstructive emphysema, 405; clinical experience with Soviet mechanical stapler for, 648; cysts of trachea and, in infants and young children, 1144; free pleural grafts for closure of stump of, 1146; acquired esophagobronchial fistula of infectious origin, 1151

Bronchus, neoplasms, Adenomas of, and carcinoid syndrome, 168; oat cell carcinoma of, secreting 5-hydroxytryptophan, 406; neoplasms of, commonly designated as adenomas, 907

Burns, Surface temperature measurements of, 227; of hands with hydrofluoric acid, 227; antibacterial defense among patients with, 227; contracture of neck caused by, 642; use of temporal artery pedicle skin flaps in repair of facial, 643; involving bones, 708; primary excision and grafting in treatment of third degree, of dorsum of hand, 709; mortality in, treated at unit for, 709; blood loss during excision of third degree, 964; antibiotic prophylaxis and gammaglobulin plasma, albumin, and saline solution therapy in severe, 964; in children, 965; emergency management of, 965; histochemical observations of second degree, 1206; evaporative water loss in patient with, 1207; in infants, 1207; pathology and pathogenesis of, 1207; sepsis of, 1207; Pseudomonas wound sepsis of, 1208; burned epileptics, 1208; Curling's ulcer, 1383; water and heat exchange in third degree, 1415

Calcaneus, Fractures of, 215; follow-up study of fractures of, 216; recent thalamic fractures of, 453; fractures of, with talocalcanear dislocation, 454

Calculi, Gallbladder carcinoma associated with cholelithiasis, 429; gallstone disease in Japan, 429; hyperparathyroidism as cause of nephrolithiasis, 635; operative cholangiography as aid in reducing incidence of "overlooked" common bile duct, 1169; disappearance of demonstrated gallstones, 1170; conservative surgery of huge renal, 1403

Cancer, See also Neoplasms

Cancer, chemotherapy, Chemotherapy of, 470; chemotherapy of solid tumors, 470; fluorinated pyrimidine therapy of advanced gastrointestinal, 666; chemotherapy of brain tumors by continuous arterial infusion, 900; effects of ionizing irradiation and chemotherapeutic agents on human chromosomes, 974; regional arterial infusion for localized, 975; regional perfusion in melanoma of limbs, 976; percutaneous visceral catheterization for infusion chemotherapy, 976; hepatic artery catheterization for prolonged infusion of liver, 976; regional perfusion and intra-arterial infusion for chemotherapy, 976; combined use of AB-132 and x-irradiation in management of advanced bronchogenic carcinoma, 1147; intraluminal perfusion of 5-fluorouracil adjuvant to surgery for gastrointestinal, 1159

Cancer, diagnosis, Detection of, in private gynecologic practice, 191; place of soft tissue arteriography, 1195; value of early case-finding in study of, 1362; radioactive fibrinogen for diagnosis of, 1422

Cancer, metastases, Neoplastic osteolytic rib lesions, 167; effect of metastatic carcinoma to lung on pulmonary function in man, 408; rates of growth of pulmonary metastases and host survival, 408; diagnosis of bone metastasis by photoscanning with strontium-85; 449; value of lymphography in search for metastases, 973; cervical metastases as first symptom of thyroid carcinoma, 1130; metastatic brain tumors, 1135; surgical treatment of solitary metastatic pulmonary lesion, 1148; rationale of palliative resection for primary, of colon and rectum complicated by liver and lung metastasis, 1165; incidence of metastasis to accessible lymph nodes from melanoma of trunk and extremities, 1367; diagnosis of liver metastases by measurement of liver activity after rectal radioiodine application, 1420

Cancer, research, Reconsideration of some significant aspects of cigarette smoking—lung cancer controversy, 170; epidemiologic investigation of gastric, 182; in African community, 1897–1956, 235; association of gastric epithelial hyperplasia and, 422; malignant transformation of fibrous dysplasia, 449; tumor-viruses and virus-tumors, 469; some psychologic characteristics of men with, 470; studies on tumor cells in circulating blood of patients with malignant tumor, 470; polluted urban air and related environmental factors in pathogenesis of pulmonary, 648; of lung and mouth in Seventh-Day Adventists, 719; incidence and significance of multiple primary malignant tumors, 720; mechanism of blood-borne metastases, 720; geographic aspects of malignant disease, 720; epidemiology of gastrointestinal, with special reference to causation, 921; thrombophlebitis as an early sign of visceral, 960; smoking in relation to mortality and morbidity, 975; spontaneous regression of, 975; relation between urinary 17-hydroxycorticosteroids and 11-desoxy-17-oxosteroids and fate of patients after mastectomy, 1142; appendix in relation to neoplastic disease, 1162; microsecond and nonosecond ruby laser radiation on rat tissues and mouse melanoma, 1215; susceptibility of injured tissues to hematogenous metastases, 1215; ABO blood groups and, 1216; multiple primary, 1216; and traumatism, 1216; spontaneous regressions and cures of, 1217; spontaneous regression of primary bile duct carcinoma, 1217; reasons for patient participation and nonparticipation in mass survey for uterine carcinoma, 1391

Carotid body, Removal of, for asthma, 167

Carpal tunnel syndrome, 640; surgical treatment for, 955

Cecum, Malignant tumors of right colon and, 1165

Cervix uteri, Roentgenologic aspects of, following segmentary cesarean section, 1175

Cervix uteri, neoplasms, Prevention of carcinoma of, 193; mesonephric adenocarcinoma and adenoma of, 193; extensive abdominal operation for carcinoma of, 193; successful pregnancy after radiation therapy for carcinoma of, 193; management of recurrent cancer of, 193; carcinoma of, 434; carcinoma of, 434; complications following radiation therapy in carcinoma of, and their treatment, 434; carcinoma in situ of, and related lesions, 676; 10 year results of individualized

treatment of carcinoma of, based on analysis of serial biopsies, 676; treatment of invasive carcinoma of, during pregnancy, 680; colposcopic and colpocytologic examination in early diagnosis of carcinoma of, in pregnancy and puerperium, 930; surgery and radiotherapy for invasive cancer of, 930; radical hysterectomy in carcinoma of, 930; cancer of, 930; unintentional removal of invasive epidermoid cervical carcinoma in total hysterectomy, 930; radiation therapy and excision of lymph nodes in cancer of, 931; surgical and radiation treatment of carcinoma of, 931; incompetent, 933; carcinoma of, during pregnancy, 934; changing incidence of carcinoma of, 1175; prognostic histologic features in invasive epidermoid cancers of, 1175; assessment of response of cancers of, to irradiation by routine histologic methods, 1175; extended Wertheim operation for primary, recurrent, or suspected recurrent carcinoma of, 1176; urologic complications in irradiation and surgical treatment of carcinoma of, 1214; carcinomatous infiltration into uterine body in carcinoma of, 1391; pathologic staging of cancer of, 1392; carcinoma of, 1392; grading of carcinoma in situ of, 1392; cytologic radiation response in cancer of, 1392; incipient carcinoma of, 1392; increase in number of 5 year cures by use of antibiotic prophylaxis in radiotherapy of carcinoma of, 1422

Cesarean section, Blood transfusion practices during, 197; upper segment, in present day obstetrics, 440; repeated, 681; in nonteaching hospitals, 934; roentgenologic aspects of cervix following segmentary, 1175; maternal mortality in, 1398; repeated childbirth by way of, 1398; hemostatic role of preoperative intravenous oxytocin in repeat, 1399

Chemotherapy, Amenorrhea and busulfan or myleran, 235; perfusion of isolated canine stomach, 1159

Children, Brain and nerve injuries in adolescents and, 153; tumors of posterior fossa in childhood and adolescence, 154; spider nevus in infants and, 161; tracheobronchial compression by congenital cardiovascular anomalies in, 169; bladder neck obstruction in, 205; stress fractures of tibia in, 215; postoperative fluid, electrolyte, and caloric requirements in, 225; normal fluid electrolyte and caloric requirements for, requiring parenteral alimentation, 225; differential diagnosis of cervical spine injuries in, 232; effect of thymectomy on skin homograft survival in, 402; surgery for ventricular septal defects in infants and, 412; volvulus of sigmoid in, 426; delayed sequels to renal injury in, 445; malignant neoplasms of kidney in, 445; urologic causes of enuresis in, 446; ileocutaneous ureterostomy in, 448; lower urinary tract tumors in, 448; fractures in, 449; indications for urgent operation in pulmonary tension disorders in, 647; carcinoid tumors of appendix in, 667; ureterocele of, 688; fibrous lesions of bone in, 691; traumatic lesions of spine in, 695; fracture of neck of femur in, 696; lymphangiography in, 705; pulmonary resection in, 908; fractures of elbow occurring in, 948; management of fractures of distal forearm in, 949; burns in, 965; results of treatment in 16 cases of sympathetic neuroblastoma in, 1154; bladder neck obstruction in, 1186; treatment of pseudarthrosis in, 1188; rhabdomyosarcoma of head and neck in, 1363; tracheostomy in, 1371; renal vein thrombosis in, 1404; nephroblastoma in, 1405; morphology and lesions of knee menisci in, 1409

Chromosomes, Effects of ionizing irradiation and chemotherapeutic agents on human, 974

Clavicle, Giant cell tumor of, 210

Colon, Retrosternal artificial esophagus created from, 414; profuse bleeding from diverticular disease of, 423; dangers of diverticulitis coli, 424; small intestinal and gastric changes in ulcerative colitis, 424; anterior resection in Hirschsprung's disease, 424; control of precancerous conditions of rectum and, 425; medical-surgical management of ulcerative colitis, 668; new surgical technique for Hirschsprung's disease, 668; surgical management of chronic ulcerative colitis, 669; primary resection in acute fulminating ulcerative colitis, 669; effectiveness of psychotherapy in treatment of ulcerative colitis, 924; intraluminal pressure patterns in diverticulosis of, 1161; acute fulminating ulcerative colitis, 1163; surgical management of chronic ulcerative colitis, 1163; rehabilitation of patients with ileostomy established for ulcerative colitis, 1164; further experience with second look, 1164; preoperative and postoperative antibiotic therapy in surgery of, 1166; simple tumid ulcers of sigmoid, 1166; in surgery of diverticulitis, 1385

Colon, neoplasms, Prognosis in carcinomas of rectum and, 187; villous adenomas of right, 424; chance of cancer and lymphatic metastasis in small tumors of, discovered by roentgenography, 425; comparison of obstructing and nonobstructing carcinoma of, 425; carcinoma of, in ulcerative colitis, 924; cytologic diagnosis of cancer of, 1164; lipomas of, 1165; surgical management of endometrioma of, 1165; rationale of palliative resection for primary cancer of rectum and, complicated by liver and lung metastasis, 1165; malignant tumors of cecum and right, 1165; right hemicolectomy in treatment of carcinomas of right, 1166

Cranium, Pterional approach to orbits for decompression or tumor removal, 156; craniosynostosis in rachitic spectrum, 210; operative treatment of monstrous sinciputoceles, 629

Cysts, Bronchogenic, 168; popliteal, in adults and children, 217; multiple nevoid basal cell epitheliomas, skeletal defects, and jaw, 401; hydatid, of left lobe of liver, 428; pancreatic, in chronic pancreatitis, 431; hydatid disease, 463; radiology in renal, particularly on left side, 467; therapy of choledochus, 672; primary echinococcal, of uterus, 675; pleuropulmonary echinococcosis, 909; mesenteric lymphatic, 915; choledochal, 926; hydatid disease of bone in Australia, 945; of frontal lobe, 971; tracheal and bronchial, in infants and young children, 1144; pulmonary, 1144; large unilateral renal, and arterial hypertension, 1403

Cytology, Pitfalls in diagnosis of oat cell carcinoma of lung with, 170; accuracy of, in treated cancer patient, 191; sputum examination in malignant coin lesions, 405; diagnosis of early lung cancer, 405; exfoliative cytologic screening for gastric cancer, 422; survey of pulmonary, 648; diagnosis of cancer of esophagus and cardia, 657; identification of neoplastic cells by multiple bone puncture, 691; diagnosis of tumors of oral cavity, 896; pulmonary, 907; possibilities of cytodiagnosis in pulmonary tumors, 1146; diagnosis of ascitic fluid, 1153; diagnosis of tumors of upper gastrointestinal tract, 1158; diagnosis of cancer of colon, 1164; diagnosis of lymph node punctures, 1201; sputum diagnosis of bronchogenic cancer, 1373

Dextran, Prevention of experimental peritoneal adhesions by, 417; of low molecular weight in ischemic ulceration of skin, 455; renal excretion of low molecular weight, 1205

Diabetes mellitus, Diabetic arthropathy, 207; hypophysectomy for treatment of diabetic retinopathy, 639; conservative amputation for lesions of feet in, 956; prediabetes and pregnancy and effect on maternal and fetal prognosis, 1177; diabetic microangiopathy in human toes with emphasis on ultrastructural change in dermal capillaries, 1200

Diverticula, Of small intestine exclusive of Meckel's diverticulum, 423; profuse bleeding from colonic, 423; dangers of diverticulitis coli, 424; intraluminal pressure patterns in diverticulosis of colon, 1161; surgery of diverticulitis, 1385

Duodenum, Postoperative complications of surgery of, 420; operative technique for management of acute and chronic lateral fistulas of, 662; role of tonus of, in filling of gallbladder as factor in biliary stasis and pathogenesis of biliary lithiasis, 921; total duodenectomy, 921

Duodenum, neoplasms, Apparently benign tumors of, 1381; surgical consideration in management of ulcerogenic tumors of pancreas and, 1382

Dupuytren's contracture, Operative treatment of, 642

Dysplasia, Malignant transformation of fibrous, 449

Ear, Vein grafts in surgery of, 148; tympanoplasty with perichondral graft, 148; periosteal grafting in tympanoplasty, 148; partial stapedectomy, 148; antihelix reconstruction, 391; subarachnoid shunt for drainage of hydrops, 391; longitudinal study of disease of, and hearing loss in patients with cleft lips and palates, 392; stapedectomy, 631; myringoplasty, 631; reconstruction of canal and middle, in chronic otitis, 895; congestion and hemorrhage in middle, of newborn, 1128; tragedy of Ludwig Van Beethoven from audiologic standpoint, 1128; deformities of, in thalidomide embryopathy, 1361; nose, throat, and, in Iliad and Odyssey, 1361

Elbow, Fractures of olecranon, 210; fractures of, occurring in children, 948; arthroplasty of, in rheumatoid arthritis, 949

Electrophoresis, Studies on reaction of bone to metals used in internal fixation of bone, 1187

Embolism, Treatment of cerebral gas, in high pressure chamber, 157; surgical treatment of pulmonary, 169; acute cor pulmonale due to pulmonary, 173; transfemoral embolectomy for occlusion of abdominal aorta and iliac arteries, 222; pulmonary vascular changes complicating ventriculovascular shunting for hydrocephalus, 397; effect of acute pulmonary, upon cardiopulmonary hemodynamics, 409; amniotic, 438; of internal carotid-middle cerebral arterial axis, 638; pulmonary embolectomy for acute cor pulmonale, 647; histologic findings in thrombolysis of arterial, with streptokinase, 701; superior mesenteric artery embolectomy, 703; pathogenesis and prevention of thromboembolic accidents following prostatectomy, 707; vascular gaps in roentgenography of pulmonary, 715; pulmonary, 957; vein ligation in treatment of pulmonary, 957; diagnosis of pulmonary, by radiating microspheres, 957; fibrinolysin treatment of thromboembolism, 958; pulmonary, 1196; severe fat, treated by intermittent positive-pressure respiration, 1414; treatment of coronary air, 1417

Emphysema, Tracheostomy and respiratory dead space in, 167; circulatory effects of chronic pulmonary, 167; expiratory stenosis of trachea and large bronchi resulting from hypotonia of pars membranacea in obstructive, 405

Endometrium, Biopsy of, 191; management of endometriosis, 1391

Enzymes, Transaminase determinations in normal and abnormal pregnancy states, 195; thrombolytic therapy with streptokinase, 460; clinical trial of edema-reducing preparation, alpha-chymotrypsin, 461; histologic findings in thrombolysis of arterial emboli with streptokinase, 701; tumoral and gastric histoenzymology of Zollinger-Ellison syndrome, 921; pancreatic, in pathogenesis of acute pancreatitis, 927.

Epilepsy, Chronic stereotactic implantation of depth electrodes for psychomotor, 1137; burned epileptics, 1208; antiepileptic medications during pregnancy, 1395

Esophagus, Modifications of, in pneumonectomized patients, 170; management of atresia of, 177; Schatzki's ring or lower esophageal web, 177; postoperative complications after treatment of atresia of, 180; demonstration of, including morphologic and functional factors, 414; retrosternal artificial, created from colon, 414; 100 esophagoplastic operations with colon, 656; gastroesophageal sphincteric function after Heller's myotomy and its modifications, 656; surgical treatment of hypermotility disturbances of, 656; bougienage, forceful dilatation, and surgery in treatment of achalasia, 912; aperistalsis of, in patients with connective tissue disorders and Raynaud's phenomenon, 912; pharyngoesophagoplasty, 912; cineradiography of varices of, 1151; acquired esophagobronchial fistula of infectious origin, 1151; technique of tunneling of retrosternal space for retrosternal esophagoplasty, 1151; achalasia of cardia, 1155; hiatus hernia and carcinoma of cardia, 1155; results of surgical treatment of congenital tracheoesophageal fistula, 1376; left colon total bypass for benign and malignant disease of, 1376; advantages, disadvantages, and dangers of Heller's operation for cardiospasm, 1377; atresia of, with superior and inferior tracheoesophageal fistulas, 1375; surgery of atresia and fistula of, 1376

Esophagus, neoplasms, Mortality and postoperative complications of resection of, for cancer, 177; benign smooth muscle tumors of, 414; surgical treatment of carcinoma of, 415; carcinoma of, 415; cytologic diagnosis of cancer of cardia and, 657; diagnosis, therapy, and ultimate results in cases of cancer of gastric cardia and, 912; adenocarcinoma of cardioesophageal junction, 915; cobalt-60 teletherapy for carcinoma of, 1152; palliative treatment of inoperable carcinoma of cardia and, 1380

Extremities, Painful disabled, 1192; congenital anomalies of, 1407

Extremities, neoplasms, Regional perfusion in melanoma of limbs, 976; incidence of metastasis to accessible lymph nodes from melanoma of trunk and extremities, 1367; angiography and peripheral circulation in tumors of, 1421

Eye, Partial cyclectomy, 147; glioma retinae, 147; flap perforation in glaucoma surgery sealed by tissue patch, 147; contact lenses, 148; surgical repair of syndrome of epicanthus inversus, blepharophimosis, and ptosis, 389; canthoplasty and brow elevation for facial palsy, 389; treatment of stenosis of lacrimal canaliculi by method of Huggert, 389; "retinal reanimation" in surgical treatment of glaucoma, 390; malignant melanoma of, and its accessory organs, 390; frequency of glaucoma in 3 population groups, 390; intracranial complications of penetrating orbital injuries, 390; animal experiments on epithelization of corneal erosions when using lysozyme or steroids, 629; management of latent effects of bony orbital injury, 629; treatment in dislocation of lens, 629; plastic material surgery of retinal detachment, 630; cataract extraction with optimum wound closure, 630; importance of contact lenses and keratoplasty in management of keratoconus, 630; photocoagulation of subconjunctival hemorrhages, 631; hypophysectomy for treatment of diabetic retinopathy, 639; von Recklinghausen's glioma of optic nerve and chiasm, 639; modified scleral buckling procedure for retinal detachment, 895; limbal lip cautery for glaucoma, 895; fascia lata in surgery of retinal detachment, 1127; simplified technique for cataract extraction, 1128; orbital tomography with injection of air and iodic hydrosoluble contrast substance, 1211; oph-

thalmologic use of mannitol, 1359; intraocular metallic foreign bodies, 1359; techniques for full thickness keratoplasty in rabbits using fresh and frozen corneal tissue, 1359; penetrating keratoplasty in aphakia, 1359; dilacerated cataract of Vogt, 1360; rehabilitation after cataract extraction, 1360; homografts of preserved sclera in retinal detachment surgery, 1360; incidence of idiopathic acquired obstructions in lacrimal drainage apparatus, 1360; photocoagulation of, 1361

FACE, Maxillofacial prosthetics, 147; fractures of bones of, 210; first aid treatment, diagnosis, and roentgenography of maxillofacial injuries, 389; management of maxillofacial injuries, 1127; fractures of, in motor accidents, 1359

Fallopian tubes, In pregnancy, 436; insufflation in hydrosalpinx, 675; hysterosalpingography in obstruction of, and infertility, 1393; plastic surgery of, at Mayo Clinic, 1393; salpingectomy and salpingoplasty for pregnancy of, 1393

Fascia, Vascularization of, in human body, 165

Femur, Idiopathic necrosis of head of, 214; primary necrosis of head of, 214; idiopathic avascular necrosis of head of, 214; replacement of head and neck of, 450; stress fracture of neck of, 451; primary prosthetic replacement in fresh fractures of neck of, 451; fracture of neck of, in children, 696; prevention of thromboembolic phenomena following operations on neck of, 696; fractures of neck of, 950; prognosis of fractures of neck of, with special reference to complications and old age, 951; early and delayed internal fixation of fractures of shaft of, 951; osteoporosis in patients with fractures of neck of, 951; osteomyelitis of, after intramedullary nailing, 952; refracture of shaft of, 952; central acetabular fractures, 1189; classification, treatment, and complications of adult subtrochanteric fracture, 1190; avascular necrosis and revascularization of head of, after intracapsular fractures, 1190; early diagnosis of slipping of upper epiphysis of, 1191; epidemiologic study of cervical and trochanteric fractures of, in urban population, 1407

Fertility, Recovery of male, after sterilization by nuclear radiation, 444; hysterosalpingography in tubal obstruction and infertility, 1393; duration of, following ovarian wedge resection, 1393; tubal plastic surgery at Mayo Clinic, 1393; salpingectomy and salpingoplasty for tubal pregnancy, 1393

Fetus, Reliability of electrocardiography of, using the abdominal recording technique, 436; cephalometry of, by ultrasound, 438; hydramniotic pregnancy with malformations of, 439; amniotic fluid analysis in prenatal diagnosis of erythroblastosis fetalis, 439; amniotic bilirubin in prognosis and treatment of erythroblastosis of, by antirhesus immunization, 439; electrocardiogram of, as diagnostic aid in obstetrics, 1177; placental lesion to account for hemorrhage into maternal circulation, 1180; transfusion of, in utero, 1180; hypofibrinogenemia and intrauterine death of, 1397

Fibrinolysis, Control of, during portacaval shunts, 671; fibrinolysin treatment of thromboembolism, 958; fibrinolytic therapy of thrombophlebitis, 1200

Fibrosis, Lymphangiographic criteria for diagnosis of retroperitoneal, 1201

Fingers, Extension of, 217; wounds of, in infants, 402; treatment of fresh metacarpal and phalangeal fractures, 694; treatment of snapping, 699; metacarpal fractures, 1189

Fistula, Gastrocolic and gastrojejunocolic, 662; operative technique for acute and chronic lateral duodenal, 662; intraosseous arteriovenous, of limbs, 691; continuous spinal drainage in treatment of postoperative cerebrospinal fluid, 901; empyema and bronchopleural, following pneumonectomy for pulmonary tuberculosis, 909; variety of rectourethral, 944; management of bronchopleural, during anesthesia, 968; carotid-cavernous, with contralateral exophthalmos, 1133; acquired esophagobronchial, of infectious origin, 1151; biochemical observations on biliary, 1170; traumatic arteriovenous, involving middle meningeal vessels, 1195; atresia of esophagus with superior and inferior tracheoesophageal, 1375; surgery of esophageal atresia and, 1376; surgical treatment of congenital tracheoesophageal, 1376; sigmoidovaginal, 1394

Fluids, Therapy with, in hemorrhagic shock, 963; harmful effects of particles in intravenous, 1423

Foot, Alignment of, in cerebral palsy patient, 216; subtalar extra-articular arthrodesis in treatment of paralytic valgus deformities, 453; march or stress fractures of metatarsal bones, 1192; Grice subastragalar extra-articular fusion for paralytic valgus utilized in talipes cavus valgus, 1193

Fractures, Polyurethane foam as adjunct to internal fixation of pathologic, 207; effect of 19-nor-androstenolone hemisuccinate on vascularization of callus of, 207; of facial bones, 210; complete, of eminentia capitata humeri, 210; of olecranon, 210; pathomechanics of carpal navicular, 211; stress, of tibia in children, 215; malleolar, 215; of os calcis, 215, 216; in children, 449; excision in radial head, 449; stress, of neck of femur, 451; primary prosthetic replacement in fresh femoral neck, 451; of hip in psychotic patient, 452; life expectancy after hip, in aged, 452; delayed union and nonunion of tibial shaft, 453; recent thalamic, of calcaneus, 453; of os calcis with talocalcanear dislocation, 454; of scapula, 694; treatment of fresh metacarpal and phalangeal, 694; and dislocations involving cervical roots but sparing cord, 694; of neck of femur in children, 696; bone grafting of ununited, 946; and subluxations of cervical vertebrae which spare cord, 947; of elbow occurring in children, 948; management of distal forearm, in children, 949; of femoral neck, 950; prognosis of femoral neck, with special reference to complications and old age, 951; results of early and delayed internal fixation of, of shaft of femur, 951; osteoporosis in patients with femoral neck, 951; refracture of shaft of femur, 952; articular, of proximal epiphysis of tibia, 953; therapy of tibial plateau, 954; indications for fixation of fibula in segmental and comminuted leg, 954; multiple rib, caused by traffic accidents and their current treatment, 1143; treatment of pseudarthrosis in children, 1188; of mandible, 1188; of neck of condyloid process, 1188; metacarpal, 1189; central acetabular, 1189; avascular necrosis and revascularization of femoral head after intracapsular, 1190; classification, treatment, and complications of adult subtrochanteric, 1190; march or stress, of metatarsal bones, 1192; effect of "delayed emergency operation" on plastic reconstruction in open, of extremities, 1206; of face in motor accidents, 1359; epidemiologic study of cervical and trochanteric femoral, in urban population, 1407; prognostic assessment in femoral neck, by radioisotope, 1408; treatment of compound tibial, 1409

Freezing, Gastric, for peptic ulcer, 183; rationale and results of gastric, for peptic ulcer, 419; for peptic ulceration in man, 664; clinical evaluation of gastric, for duodenal ulcer, 664; successful preservation of mouse thymuses by, 720; effects of gastric, on vitamin B_{12} absorption, acid secretion, tissue morphology, and serum enzymes, 917; physiologic interpretation of gastric, in human, 917; clinical evaluation of gastric,

for peptic ulcer, 918; effects of gastric, on isolated denervated gastric pouch in dogs, 1156; effects of, on gastric mucosa of dogs, 1156; gastric, for treatment of duodenal ulcer, 1380

GALLBLADDER, Incidence of gallstone disease following partial gastric resection, 188; disease of, following gastrectomy, 188; mimicry of acute cholecystitis by erythromycin estolate reactions, 428; primary and follow-up results for 823 cholecystectomized patients, 428; carcinoma of, associated with cholelithiasis, 429; role of tonus of duodenum in filling of, as factor in biliary stasis and pathogenesis of biliary lithiasis, 921; acute cholecystitis, 926; late results following cholecystectomy and special studies on postoperative biliary distress, 1171; cholelithiasis and choledocholithiasis, 1388; acute cholecystitis, 1388

Gastrectomy, Clinical and biochemical investigations of hepatic function after, 185; comparison of combined operation and Billroth I, in treatment of chronic duodenal ulcer, 185; incidence of gallstone disease following partial, 188; gallbladder disease following, 188; distribution of pyloric mucosa in specimens obtained by partial, 422; jejunal mucosal appearances after total, 423; subtotal, with gastroduodenal anastomosis, 1382; studies of weight loss in patients after using radioactive isotope techniques, 1383; role of metabolic factors in early dumping syndrome, 1383; body composition in postgastrectomy state, 1414

Gastrointestinal tract, Surgical management of duplications of, 181; spontaneous rupture of, in newborn, 182; Baker-Hughes multiple retrieving tube for biopsy of, 182; surgical management of multiple polyposis, 186; postoperative motility of, 226; new suction tube for diagnosis of obscure bleeding from, 418; effects of surgery on upper, on blood formation and bone metabolism, 421; bowel habit after vagotomy and gastrojejunostomy, 422; small intestinal and gastric changes in ulcerative colitis, 424; early endoscopic diagnosis of acute hemorrhage from upper, 660; foreign bodies in, 660; azygography in patients with hemorrhage from, 661; gastrocolic and gastrojejunocolic fistulas, 662; obstruction of small intestine by orange in postgastrectomy patient, 665; hemorrhage from upper, 916; seasonal incidence of bleeding from upper, 916; hemorrhage from, in infancy and childhood, 916; gastric hypothermia for active hemorrhage from upper, 917; obstructing gastroduodenal ulcers, 918; acute perforation of duodenal and gastric ulcer, 918; simplified capsule for biopsy of, 920; tumoral and gastric histoenzymology of Zollinger-Ellison syndrome, 921; Zollinger-Ellison syndrome treated without gastric surgery, 928; sources of bleeding in hemorrhage from upper, 1154; foreign bodies in, 1155; Henley's remedial operation for dumping syndrome, 1160; surgical emergencies of lower, 1160

Gastrointestinal tract, neoplasms, Carcinoid tumors of, 181; fluorinated pyrimidine therapy of advanced cancer of, 666; epidemiology of cancer of, with special reference to causation, 921; cytologic diagnosis of tumors of upper, 1158; intraluminal perfusion of 5-fluorouracil adjuvant to surgery for cancer of, 1159

Genitalia, female, Etiologic role of chronic iron deficiency in production of menorrhagia, 191; amenorrhea and busulfan or myleran, 235; causes of death in cases of preclimacteric menorrhagia, 433; ruptured adnexal abscess with generalized peritonitis, 435; diagnostic significance of gynecography, 468; water soluble, viscosized water soluble, and oily iodine contrast materials in hysterosalpingography, 468; hysterosalpingography, 675; blood volume studies in normal pregnancy, toxemia, and gynecologic patients, 678; reconstruction of pelvic floor after radical pelvic surgery, 931; fate of woman castrated by irradiation, 932; some improved crystal vibrators for use in ultrasonic methods of gynecologic diagnosis, 1391

Genitalia, female, neoplasms, Cancer detection in private gynecologic practice, 191; pelvic cancer, 191; accuracy of cytologic diagnosis in treated cancer patients, 191; uterine fibroma and genital prolapse, 192; carcinoma of, and thyroid disease, 433; extraovarian mesonephric carcinoma, 677; radon and radioactive seed volume implants for extensive recurrent vaginal-pelvic cancer, 1176

Genitalia, male, neoplasms, Radiology in diagnosis of tumors of seminal vesicles and cystic formations of lower genitourinary tract of man, 1400; cancer of scrotum in workers of screw-cutting industry, 1401

Geriatrics, Microscopic and submicroscopic differentiation of connective tissue changes caused by aging and degeneration, 209; gastric ulcer in aged and calcified atherosclerosis, 420; life expectancy after hip fractures in aged, 452; aging and collateral peripheral artery, 459; surgery in patients between 80 and 100 years of age, 461; tetanus after 70, 710; prognosis of femoral neck fractures with special reference to complications and old age, 951; general anesthesia for very aged, 970; breast cancer in ninth and tenth decades, 1142

Glomus jugulare, Technique for removal of tumors of, 391; light and electron microscopic study of, 629

Glycerol, Oral, for reduction of intracranial pressure, 900

Grafts, Prostheses and autogenous dermal, 162; evaluation of homograft prolongation methods, 235, electron microscopic study of homograft reaction; 236; effect of thymectomy on skin homograft survival in children, 402; survival of arteries in experimental full thickness skin autografts, 402; early circulation in split skin, 641; technique of split thickness skin, in repair of contractures of burned hands, 1368

HAND, Emergency treatment with delayed surgical repair in surgery of, 162; reconstruction of thumb by composite bone-skin flap, 165; surgical treatment of spastic "thumb-in-palm" deformity, 165; reconstruction of thumb immediately after injury, 166; simple method of transfixing sutures in repair of extensor tendons, 166; ancillary procedures in surgery of, 217; hydrofluoric acid burns of, 227; intravenous regional anesthesia in surgery of, 1210; ring finger pollicization, 1368; technique of split thickness skin grafting in repair of contractures of burned, 1368

Head, Management of advanced cancer of neck and, 635; injuries of neck and, in high school football, 698

Heart, Acute cor pulmonale due to pulmonary embolism, 173; congenital aneurysms of sinuses of Valsalva, 173; left ventricular aneurysm due to myocardial infarction, 173; surgical treatment of aortic coarctation in older people with or without associated anomalies of great vessels and, 174; absence of pulmonary valve in tetralogy of Fallot, 176; renal function in acquired disease of, and effects of extracorporeal circulation, 201; angiocardiography of left, 232; transseptal catheterization of left, with puncture of interatrial septum, 408; transseptal catheterization of left, without needle puncture of interatrial septum, 408; cardioscopy without thoracotomy, 409; diagnosis of patent ductus arteriosus from measurements of blood oxygen saturation, 409; effect of acute pulmonary embolus upon cardiopulmonary hemodynamics, 409; anomalous left coronary artery originating from pulmonary artery, 411; pathologic anatomy of tetralogy of Fallot and its variations, 413; disease of, in pregnancy, 436; isolated artificial cerebral circulation combined with general moderate hypothermia for open surgery of, 465; prone-

thalol in treatment of ventricular arrhythmias during anesthesia, 465; roentgenography of great vessels and, 467; pulmonary embolectomy for acute cor pulmonale, 647; pneumatically driven sac type of intrathoracic artificial, 655; disease of, as cause of cerebral circulatory disturbances, 899; administration of oxygen under increased pressure in low cardiac output caused by injection of microspheres of divinylbenzene into coronary arteries, 910; myxoma of left atrium, 910; congenital insufficiency of pulmonary valve, 910; high pressure ventricular septal defects, 910; natural history of ventricular septal defect in patients surviving infancy, 1148; transplantation of, in man, 1150; ventricular septal defect, 1374

Heart, arrest, Local hypothermia in elective arrest of, 172; management of arrest of, 409, 410; external cardiac massage for arrest due to myocardial infarction, 651; direct current external countershock, 652; closed chest cardiac resuscitation, 652; external cardiac resuscitation, 1149

Heart, block, Treatment of Stokes-Adams disease by implantation of entirely intracorporal stimulator, 655; physical principles of artificial stimulation of, 909; long term therapy with implanted electrical pacemaker, 911; artificial electrical pacing, 1149; investigation of failure of artificial pacing, 1149; hemodynamic studies in patients with implanted cardiac pacemakers, 1150; implantable cardiac pacemakers, 1375

Heart, surgery, Cardiovascular surgery in infancy, 173; transatrial approach to ventricular septal defect, 174; congenital aortic stenosis syndrome in infancy, 175; successful correction of traumatic aortic valve regurgitation, 175; complete correction of tetralogy of Fallot, 176; low molecular weight dextran in open surgery, 228; results of open surgery of, by simplified technique, 229; total body perfusion in operations on, 229; myocardial revascularization by internal mammary artery implantation and supplementary techniques, 410; treatment of coronary artery heart disease by internal mammary artery implantation, 410; cardiovascular surgery during first year of life, 411; surgery for ventricular septal defects in infants and children, 412; diversion of venae cavae into left atrium during closure of atrial septal defects, 412; mitral valve replacement with preservation of papillary muscles and chordae tendineae, 412; treatment of aortic stenosis, 413; correction of tetralogy of Fallot, 413; hemodynamic studies 2 weeks to 6 years after repair of tetralogy of Fallot, 413; treatment of valvular incompetence, 652; combined internal mammary artery implantation and free omental graft operation, 652; multiple valve replacement, 653; homograft aortic valve replacement in aortic incompetence and stenosis, 653; treatment of acquired aortic stenosis in adults, 653; closed valvuloplasty for mitral stenosis, 653; hemorrhage, coagulation, and hemostasis in open surgery of, 654; mitral commissurotomy, 654; immediate complications of thoracotomy for heart disease, 655; induced ventricular fibrillation in open surgery of, 655; surgery under hyperbaric oxygenation in infants with congenital cardiac disease, 711; syndrome resembling infectious mononucleosis after open surgery of, 711; early and late results of partial and total replacement of aortic valve with individual teflon cusps, 911; Blalock-Taussig operation for tetralogy of Fallot, 911; teflon and pericardial aortic valve prosthesis, 1149; open correction of tetralogy of Fallot, 1149; radical surgery for tetralogy of Fallot, 1149; mesenteric artery insufficiency complicating repair of aortic regurgitation, 1199; clinical diagnosis and surgical management of ruptured mitral chordae tendineae, 1374; reoperation for mitral stenosis, 1375; treatment of complete heart block, 1375; pregnancy following surgery on, 1395; pattern of blood volume responses to open surgery of, 1416; open surgery of, in Jehovah's witnesses, 1417; treatment of coronary air emboli, 1417

Hematoma, Subdural, in newborn, 154; spontaneous intracranial, in patients receiving anticoagulation therapy, 156; diagnosis and treatment of subdural, 160; surgical management of encapsulated subdural, 396; subcutaneous cranial, in newborn, 442; treatment of subungual, 454; arteriography in diagnosis of subdural, 904; extradural, 1134; multiple and associated traumatic intracranial, 1365; demonstration of substances capable of contracting smooth muscle in fluid of, from ruptured cerebral aneurysms, 1365

Hemophilia, Operative surgery in, 1202

Hemorrhage, Diagnosis and recent advances in treatment of subarachnoid, 400; new suction tube for diagnosis of obscure gastrointestinal, 418; management of obstetric, in United States, 440; photocoagulation of subconjunctival, 631; early endoscopic diagnosis of acute upper gastrointestinal, 660; azygography in patients with gastrointestinal, 661; role of thrombocytopenia in, of cirrhosis of liver, 671; spontaneous intraperitoneal, during pregnancy, 679; intracranial, following surgical revascularization for treatment of acute strokes, 701; hypogastric artery ligation for uncontrollable, in acute pelvic trauma, 703; from upper alimentary tract, 916; seasonal incidence of, from upper gastrointestinal tract, 916; gastrointestinal, in infancy and childhood, 916; gastric hypothermia for active upper gastrointestinal tract, 917; fluid therapy in shock due to, 963; bleeding diatheses in surgical patients, 963; reanesthetizing patients undergoing tonsillectomy and adenoidectomy because of persistent postoperative, 967; hematemesis and melena, 1154; sources of upper gastrointestinal, 1154; surgical treatment of uncontrollable, from esophageal varices by cardia transplantation, 1155; gastrointestinal, in 3 patients with chronic liver disease, esophageal varices, and normal portal pressure, 1168; stress and multiple factor cause of, 1412; without hypotension, 1424

Hemorrhoids, Nonoperative treatment of internal, 426; improved technique in hemorrhoidectomy, 925

Hernia, Anemia associated with diaphragmatic, 178; treatment of hiatus, by hiatus herniorrhaphy, vagotomy, and drainage procedure, 180; local anesthesia for hernioplasty, 180; successful, simplified technique of grafting in repair of, 180; hydrocele, undescended testicle, and, 200; operation for hiatus, and cardioesophagheal chalasia by fundoplication after Nissen, 418; natural evolution of hiatal, 658; of foramen of Bochdalek, 659; recurrent inguinal, 659; inguinal herniorrhaphy using stainless steel wire mesh, 659; immediate complications of surgery of, 660; hiatus, with contortions of neck, 913; esophageal hiatus, in infants and children, 913; postoperative pericardial, 1150; indirect inguinal, 1154; hiatus, and carcinoma of cardia, 1155; hiatus, in pregnancy, 1178; synthetic mesh repair of abdominal wall defects, 1379; epigastric incisional, 1379; esophageal hiatal, 1379; recurrent inguinal and femoral, 1379; repair of preperitoneal, 1380; strangulated obturator, 1380

Hip, Treatment of synovitis of, and osteomyelitis in infants with antibiotics and sulfonamides, 213; denervation of, for painful arthrosis, 213; arthrodesis of, 214; arthroplasty of, 451; fractures of, in psychotic patient, 452; life expectancy after fractures of, in aged, 452; variations in intra-articular pressure of, in injury and disease, 696; "complete" roentgenog-

raphy of femoral head and, 717; evaluation of buttress operations in dislocations of, 950; treatment of adolescent coxa vara, 950; juvenile coxitis laminaria, 1189; 100 hanging procedures on, 1189; decompression operation in arthritis of, 1189

Hormones, Effect of 19-nor-androstenolone hemisuccinate on vascularization of fracture callus, 207; prolonged postpartum dysfunctional uterine bleeding subsequent to prenatal therapy with parenteral potent progestogens, 1391

Hydrocephalus, Today's problems in, 157; recognition and treatment of, following spontaneous subarachnoid hemorrhage, 158; comparative study of, in children with and without operation, 158; test for patency of ventriculovascular shunt for, with RISA, 158; pulmonary vascular change complicating ventriculovascular shunting for, 397; ventriculocardial shunt with Spitz-Holter valve for treatment of, 1135

Hypothermia, Local, in elective cardiac arrest, 172; extracorporeal circulation and, 464; findings in experimental deep, induced in laboratory animals, 464; physiologic studies following closed chest technique of profound, in neurosurgery, 711; gastric, for active upper gastrointestinal tract hemorrhage, 917; for neurosurgery, 1134; late effects of regional renal, 1416; treatment of intracranial vascular disorders with aid of profound, and total circulatory arrest, 1416

ILEUM, Incidental appendectomy with regional enteritis, 665; regional enteritis, 665; construction and management of ileostomy, 665; President Eisenhower's operation for regional enteritis, 923; surgical correction of ureteroileal strictures, 944; ileostomy dysfunction, 1162; surgical management of regional enteritis, 1162; rehabilitation of patients with ileostomy established for ulcerative colitis, 1164

Infections, Research on bacteria of group Proteus isolated in urinary, 228; treatment of anaerobic, with hyperbaric oxygen, 228; ecology and epidemiology of coliform, 462; shock caused by gram-negative microorganisms, 462; intestinal perforation in enteric fever, 666; epidemiology of staphylococcal, 709; bacterial flora of clean wounds and its relation to subsequent sepsis, 710; newer antibacterial drugs in urologic, 944; changing values of, in surgery, 965; gas bacillus, of abdominal wall, 1208

Instruments and apparatus, Artificial electrical stimulator for paralyzed human bladder, 205; use of extruded collagen suture, 230; continuous or interrupted suture technique, 230; new suction tube for diagnosis of obscure gastrointestinal bleeding, 418; maternal and fetal effects in 476 applications of vacuum extractor, 682; vacuum extractor, 682, 683; artificial stimulation of heart, 909; simplified stapling apparatus for automatic suturing of small blood vessels, 970; vacuum extractor, 1181; metabolic effects of mechanical ventilation and respiratory alkalosis in postoperative patients, 1413

Insulin, Micromelia in chickens induced by, 469

Intersexuality, Genitography in, 690

Intestines, Asepsis of, with neomycin and framycetin, 185; collagen disease associated with malabsorption and spruelike changes in mucosa of, 186; diagnosis of colonic and terminal ileal aganglionosis, 186; diverticula of small, exclusive of Meckel's diverticulum, 423; obstruction of small, by orange in postgastrectomy patient, 665; perforation of, in enteric fever, 666; isotopic identification of strangulation obstruction, 667; obstruction of, during neonatal period, 667; obstruction of, during early postoperative period, 667; new intubation principle with application to large, 714; biopsy of, 922; postoperative tension pneumoperitoneum, 922; internal strangulating obstruction of, 922; uncomplicated meconium ileus, 922; obstruction of, in obstetrics 934; nonspecific enteritis resulting from mesenteric vascular insufficiency, 959; hemorrhagic necrosis of, 1161; toxicity of fluid from experimentally strangulated loops of, in rat, 1161; obstruction of, after pelvic and abdominal radiation therapy, 1161; relation of d-pantothenyl alcohol therapy to resumption of function of, postoperatively, 1161; meconium ileus, 1384, 1385; idiopathic perforation of, in newborn, 1385

Intestines, neoplasms, Of small, as elusive source of abdominal symptoms, 186; papillary (villous) adenomas, 669; tumors of small, 922; lipomas of large, 923; primary malignant tumors of small, 1160

Intussusception, Retrograde, of jejunum following gastric resection, 420; conventional roentgenography in diagnosis of, in children, 923

Iron, Etiologic role of chronic deficiency of, in production of menorrhagia, 191

JAW, First aid treatment, diagnosis, and roentgenography of maxillofacial injuries, 389; multiple nevoid basal cell epitheliomas, skeletal defects, and cysts of, 401; muscle patterning factors in surgical correction of mandibular prognathism, 402; maxillary osteomyelitis in infant, 895; mandibular joint arthrosis corrected by insertion of cast-vitallium glenoid fossa prosthesis, 946; management of maxillofacial injuries, 1127; fractures of mandible, 1188; fractures of neck of condyloid process, 1188; bone defect treatment in surgical procedures on jawbone, 1362

Jejunum, Retrograde intussusception of, following gastric resection, 420; mucosa of, after total gastrectomy, 423

Joints, Lymphatic vascularization of synovial layer, 208; radiologic aspects of bones and, in arteritis of lower limbs, 222; treatment of acromioclavicular dislocations, 693; bursitis lipocalcinogranulomatosa, 699; acute synovial rupture in rheumatoid arthritis, 700

KIDNEY, Radioisotopic studies of function of, and surgical findings in 102 hypertensive patients, 201; effect of hypertonic mannitol infusion on renal clearances in humans with normal or diseased, 201; function of, in acquired valvular heart disease and effects of extracorporeal circulation, 201; diagnosis of hypertension caused by unilateral renal artery disease, 202; segmental renal ischemia in hypertension, 202; whole body radiation in man as preliminary to transplantation of, 204; survival of homotransplants of, in dogs treated by chemotherapy, radiation, and cross circulation, 204; delayed sequels to injury of, in childhood, 445; arteriography, function studies, and biopsy of, in human hypertension, 445; homografts of, in patients with major donor-recipient blood group incompatibilities, 445; return of function of, after varying periods of ureteral occlusion, 446; radiology in cysts of, particularly on left side, 467; 24 hour storage of, with report of successful canine autotransplant after total nephrectomy, 471; reversal of early graft rejection after heterotransplantation of, in man, 471; problems in homotransplantation of, 471; hyperparathyroidism as cause of nephrolithiasis, 635; function of, after renal revascularization for hypertension, 687; ileal urinary diversion in ectopia of, 687; renal factor in hypertension due to coarctation of aorta, 702; mannitol therapy in oliguria of acute onset, 707; hypertension as related to ischemia of, 941; insufficiency and tuberculosis of, 941, 942; roentgenologic proof and evaluation of

hypoplasia of, 942; polycystic disease of, 942; simple storage technique, 942; pelvic, and postnatal considerations, 1182; morphology of renal lobulations and calices and their relationship to partial nephrectomy, 1185; conservative surgery of huge calculi of, 1403; cystic disease of renal pyramids, 1403; large unilateral cysts of, and arterial hypertension, 1403; fetal lobulation of, 1403; after traumatic rupture of posterior urethra, 1404; megacalyx, 1404; renal vein thrombosis in children, 1404

Kidney, neoplasms, Tumor of, in adults, 202; tumors of suprarenals and, in adults, 203; Wilms's tumors, 203; radiotherapy in treatment of hypernephroma, 234; malignant neoplasms of, in children, 445; diagnosis of tumors of, with radioisotopes, 718; diagnosis of hypernephroma, 941; angioma of, 942; malignant tumors of, in infants, 1185; tumors of, 1405; nephroblastoma in children, 1405

Knee, Meniscal lesions of, 215; radiosurgical correlations of 241 meniscectomies, 452; long term effects of football injury to, 697; injuries of meniscus, 697; arthrogram of, following meniscectomy, 697; recurring dislocations of patella in athletes, 952; chronic synovial effusions treated with intra-articular radioactive gold, 953; meniscofemoral ligaments of human, 953; meniscus and collateral ligament injuries of, due to "twist," 1191; value of double contrast arthrography of, in surgery of meniscus, 1191; surgical treatment of posttraumatic rigidity of, 1191; lesions of, from "twist," 1408; reconstruction of anterior cruciate ligaments, 1408; morphology and lesions of menisci in children, 1409; injuries of menisci of, 1409; surgery for osteochondritis dissecans of, 1409

Labor, Hyperextension of head with breech presentation, 196; transverse presentation of fetus, 196; prolapse of cord, 196; fetal mortality in breech delivery, 197; induction of, with intravenous fat emulsion at term, 439; buccal oxytocin in induction of, 440; rupture of uterus, 440; transverse fetal lie in, 679; maternal and fetal effects in 476 applications of vacuum extractor, 682; vacuum extractor, 682, 683; perinatal mortality and maternal morbidity in spontaneous and forceps vaginal deliveries, 936; elective induction of, 936; induction of, by intra-amniotic instillation of hypertonic solutions, 1180; intravenous dimenhydrinate in, 1180; vacuum extractor, 1181; breech deliveries, 1181, 1181, 1181; intravenous injections of orasthin, tokofinal, or syntocinon mixed with cardiazol to accelerate delivery of twins and relation of this type of delivery to uterine rupture, 1397; clinical, psychologic, roentgenologic, and electroencephalographic late findings following vacuum extraction, 1398

Larynx, Treatment of simple and precancerous epithelial hyperplasia of, 632; z-shaped incision for total laryngectomy, 632; partial laryngopharyngectomy, 1132

Larynx, neoplasms, Surgical treatment of cancer of hypopharynx and, 152; surgical treatment of oral and laryngopharyngeal cancer, 393; results of therapy in carcinoma of, 393; treatment of advanced cancer of laryngopharynx, 636; carcinoma of, 1131; radiotherapy in carcinoma laryngis, 1131

Lip, Refinements in rotation-advancement technique for cleft, 163; cleft palate and, 163; neonatal orthopedic correction for patients with cleft palate and, 164; prevention of maxillary collapse in congenital cleft palate and, 164; use of tongue flaps in reconstruction of lower, 165; longitudinal study of ear disease and hearing loss in patients with cleft palate and, 392; composite flaps and grafts in secondary cleft deformities, 402; presurgical orthopedics and bone grafting for infants with cleft palate and, 642; repair of cleft, by Millard's rotation-advancement method, 642; management of cleft palate and, in United States and Canada, 905; anesthetic management for surgery of cleft palate and, 1210

Lip, neoplasms, Cancer of, 392; treatment of cancer of, 1129; cancer of, 1367

Liver, Rose bengal-I^{131} hepatic photoscan in diagnosis and management of abscess of, 188; advanced cirrhosis of, 427; hydatid cyst of left lobe of, 428; surgery of abscesses of, 670; hemihepatectomy and resection of, 670; hepaticojejunostomy and choledochojejunostomy, 670; hepaticojejunostomy with transhepatic intubation, 671; role of thrombocytopenia in hemorrhages of cirrhosis of, 671; biliary decompression without other external drainage in treatment of injuries of, 673; estimation of segmental hepatic venous flow in man, 925; regeneration of, following multiple resections, 925; accidental hepatic artery ligation in humans, 1168; hepatic purpura and splenic plasmosarcomatosis, 1168; gastrointestinal bleeding in 3 patients with chronic disease of, esophageal varices, and normal portal pressure, 1168; hepatic regeneration after partial hepatectomy in course of cirrhosis, 1169; operative results in intrahepatic cholestasis, 1170; resection of, for massive trauma, 1386; differential diagnosis of large irregular, by pneumoperitoneum, laparoscopy, and hepatic biopsy, 1386; needle biopsy of, in infants and children, 1387; spontaneous rupture of, in pregnancy, 1395; comparative postmortem examination in angiography of, 1421

Liver, neoplasms, Hepatic arteriography in diagnosis of tumors of, 717; hepatic artery catheterization for prolonged infusion chemotherapy of cancer of, 976; primary carcinoma of, 1168

Lung, Bronchogenic cyst, 168; empyema thoracis in pediatrics, 169; thoracic adenopathies, 169; esophageal modifications in pneumonectomized patients, 170; lymphatic circulation of, 406; early lipoid pneumonia, 406; effect of acute pulmonary embolus upon cardiopulmonary hemodynamics, 409; traumatic injuries of tracheobronchial tree, 647; pulmonary embolectomy for acute cor pulmonale, 647; indications for urgent operation in pulmonary tension disorders in childhood, 647; biopsy of scalene lymph nodes and right thoracic duct lymph node for diagnosis of disease of, 648; experience with Soviet mechanical bronchus stapler, 648; bronchial stump closure in resection of, 650; experimental homotransplantation of, with cytoxic agents, 651; diagnosis and treatment of sequestration of, 907; sequestrations, ectopic lungs, and aberrant vessels, 908; resection of, in children, 908; pleuropulmonary echinococcosis, 909; homotransplantation of, in dogs, 977; bronchial lavage in treatment of obstructive disease of, 1144; cysts of, 1144; nonspecific abscess of, 1145; evaluation of automatic suture with UKL-60 and UKL-40 devices for resection of, 1145; open biopsy in diffuse disease of, 1146; therapy and prognosis of spontaneous pneumothorax, 1371; spontaneous pneumothorax and its therapy with consideration of dystrophic changes of, 1371; prophylaxis and treatment of acute respiratory insufficiency during thoracic surgery in patients with impaired pulmonary function, 1372; treatment of acute thoracic injuries, 1372; immediate postoperative complications of pneumonectomies, 1373; open biopsy of, 1373

Lung, neoplasms, Controversy regarding cigarette smoking and cancer of, 170; pitfalls in cytologic diagnosis of oat cell carcinoma of, 170; bilateral pulmonary resection for primary or metastatic cancer of, 171; paramalignant syndromes in carcinoma of, 171;

radiotherapy in cancer of, classified as inoperable at exploratory thoracotomy, 171; Pierre Marie-Bamberger syndrome and carcinoma of, 171; giant cell carcinoma of, 172; cytologic sputum examination in malignant coin lesions, 405; cytologic diagnosis of early cancers of, 405; alveolar cancer of, 407; occult carcinoma of, 407; effect of metastatic carcinoma to, on pulmonary function in man, 408; rates of growth of pulmonary metastases and host survival, 408; polluted urban air and related environmental factors in pathogenesis of cancer of, 648; cytology of, 648; localized amyloid "tumors" simulating malignant neoplasms, 648; alveolar cell carcinoma of, 649; mortality from cancer of, as related to residence and smoking histories, 649; slowly progressing cancer of, 649; natural history of untreated cancer of, 650; preoperative radiation therapy of, 650; radiation and cancer of, 650; diffuse malignant pleural mesothelioma, 651; cancer of mouth and, in Seventh-Day Adventists, 719; cytology of, 907; pathology of mesotheliomas and analysis of their association with asbestos exposure, 908; cancer of, in Alps, 908; possibilities of cytodiagnosis in tumors of, 1146; benign tumors of, 1146; preoperative irradiation in bronchogenic carcinoma, 1147; combined use of AB-132 and x-irradiation in management of advanced bronchogenic carcinoma, 1147; primary carcinoma of, 1148; surgical treatment of solitary metastatic pulmonary lesion, 1148; presurgical irradiation in bronchogenic carcinoma of, 1213; sequelae of radical radiotherapy of carcinoma of, 1213; clinical course, diagnosis, and therapy of alveolar cell carcinoma, 1216; respiratory and circulatory function of patients with bronchogenic carcinoma, 1373; sputum diagnosis of bronchogenic cancer, 1373; prognosis of operative treatment of bronchial carcinoma, 1374; bronchogenic carcinoma in women, 1374

Lymph nodes, Cytologic diagnosis with punctures of, 1201

Lymphatic system, Lymphatic vascularization of synovial layer, 208; chylous reflux, 223; lymphatic circulation of lungs, 406; lymphangiography in children, 705; lymphangiography for malignant diseases in children, 706; diagnostic problems in lymphangioadenography, 716; combined search for abdominal metastases with scintography of, and cavography, 716; current status of lymphangiography, 961; lymphography, 962; lymphangiographic criteria for diagnosis of retroperitoneal fibrosis, 1201; evaluation of lymphangiography, inferior vena cavography, and intravenous pyelography in clinical staging and management of Hodgkin's disease and lymphosarcoma, 1201; lymphatic circulation of upper extremity after radical operation for cancer of breast and its relation to secondary edema of arm, 1369

MALINGERING, Pathologic, 1193

Manipulation, Pros and cons of, 454; results following rotatory, in lumbar intervertebral disc syndrome, 696

Mannitol, Effect of hypertonic infusion of, on renal clearances in humans with normal or diseased kidneys, 201; prevention of postoperative acute renal failure with, 225; in oliguria of acute onset, 707; ophthalmologic use of, 1359

Marfan's syndrome, Skeletal manifestations in, 208

Mastoid, Infected, in antibiotic era, 392

Mediastinum, Mediastinal and mediastinopulmonary form of sarcoidosis, 416; diagnosis and treatment of ectopic thyroid of, 657; pneumomediastinography by transsternal method, 1420

Mediastinum, neoplasms, Lipoma and liposarcoma of, 415; primary tumors of, 657

Meninges, Study of meningiomas with correlation of hyperostosis and tumor vascularity, 160; carcinomatosis of, 160; diagnosis and recent advance in treatment of subarachnoid hemorrhage, 400

Mitral valve, Bare finger mitral valvotomy, 175; changes of some hemodynamic and electrocardiographic indices in repeated mitral commissurotomy, 175; replacement of, with preservation of papillary muscles and chordae tendineae, 412; incised commissure in stenosis of, 412; closed valvuloplasty for stenosis of, 653; restenosis of, 654; clinical evaluation after mitral commissurotomy, 654

Mononucleosis, infectious, Obstetric aspects of, 1396; results of studies on, with consideration of intracutaneous diagnosis, 1396

Mortality, Maternal, and incidence of abnormalities in women of parity 6 or more, 196; perinatal death, 684; maternal deaths in California, 1957–1962, 936; perinatal, and maternal morbidity in spontaneous and forceps vaginal deliveries, 936; maternal, in Sweden, 936; perinatal, in multiple gestations, 937; problem of maternal, in cesarean sections, 1398

Mouth, neoplasms, Critical surgical problems in treatment of oral and laryngopharyngeal cancer, 393; cancer of, 632; cancer of lung and, in Seventh-Day Adventists, 719; cytologic diagnosis of tumors of, 896; squamous carcinoma of buccal and gingival mucosa, 1129; value of early case-finding in study of cancer, 1362; stromal interference in radioresponse of squamous cell carcinoma of, 1421

Muscles, Gracilis syndrome, 218; Volkmann's ischemia, 954; necrotizing fascitis, 955; dynamic treatment of low back strain syndrome, 955

Myasthenia gravis, Systemic lupus erythematosus cirrhosis and ulcerative colitis after thymectomy for, 178; morphologic evidence of thyroiditis, 472

Mycoses, Opportunistic fungal infections of urinary tract, 204; infections of bone, 1187

NASOPHARYNX, neoplasms, Angiofibroma of, in adolescent male, 149; carcinoma of, 149

Neck, Prolonged postoperative cervical pressure as adjunct to plastic surgery on, 165; simultaneous bilateral dissection of, 393; cervical cysts, sinuses, and fistula of branchial pharyngothymic ducts, and thyroglossal duct origin, 635; effect of thalamic lesions upon torticollis, 635

Neck, neoplasms, So-called primary tumors of, 635; management of advanced cancer of head and, 635; malformations and tumors of veins in, 641; cavernous hemangiomas of head and, 643; teratomas of, 897; rhabdomyosarcoma of head and, in children, 1363

Neoplasms, See also under organs and regions

Neoplasms, Desmoid tumors, 235; groin dissection for malignant melanoma, 401; thymomas, 657; Burkitt's tumors, 691; osteoid osteoma, 693; primary thoracic hemangiopericytoma, 913; combined stereotactic operation for treatment of deep-seated angiomas and aneurysms, 1137; sympathicoblastomas, 1153; treatment in sympathetic neuroblastoma in children, 1154; place of soft tissue arteriography in diagnosis of, 1195

Nerves, cranial, Trigeminal compression for tic douloureux, 157; surgical technique for relief of glossopharyngeal neuralgia, 159; Sjöqvist's tractotomy, 398; von Recklinghausen's glioma of optic nerve and chiasm, 639

Nerves, peripheral, Microfilter sheaths for sutures of, and homologous transplants, 159; regeneration of, by irradiated homografts, 399; carpal tunnel syndrome, 640; microsurgery of, 640; pathologic changes in rats' nerves subject to moderate compression, 902; long term results of surgical repair in injuries of, 903; surgical treatment for carpal tunnel syndrome, 955

Nerves, sympathetic, High lumbar sympathectomy in arterial obstructive diseases of lower limbs, 399; second thoracic sympathetic ganglionectomy for neurologic and vascular disturbances of upper extremities, 903; sympathectomy in treatment of obliterative peripheral vascular disease, 904; neuroblastoma, 1138

Neurosurgery, Reversible heat lesions with radiofrequency current, 157; use of staphylomycine in, 227; blood-gas analyses in unconscious neurosurgical patients on admission to hospital, 396; clinical experience with closed chest method of producing hypothermia and total circulatory arrest in, 398; treatment of increased intracranial pressure in, 637; physiologic studies following closed chest technique of profound hypothermia in, 711; anesthesia for, 967; hypothermia for, 1134

Nevi, Spider, in infancy and childhood, 161; value of pedicled rotation flaps in treatment of pigmented, in children, 906

Newborn, Subdural hematoma in, 154; spontaneous rupture of gastroenteric tract in, 182; gastric perforation in, 183; hexachlorophene bathing in, 197; problems in management of intermittent positive pressure respiration in, 441; pneumothorax and pneumomediastinum in, 441; subcutaneous cranial hematoma in, 442; listeriosis in, 442; intestinal obstruction in, 667; death of, 684; prematurity, perinatal mortality, and maternal heart volume, 932; surgery of, at Cook County Hospital, 978; congestion and hemorrhage in middle ear of, 1128; intravenous pyelography in infants with single umbilical artery, 1182; meconium ileus, 1384; management of complicated meconium ileus, 1385; idiopathic intestinal perforation in, 1385; fallacies in prediction of severity of hemolytic disease of, in patients with rhesus isoimmunization, 1397

Nose, Nasal hump problem, 163; problem of root of, in corrective rhinoplasties, 631; ear, throat, and, in Iliad and Odyssey, 1361

Nose, neoplasms, Hemangiopericytoma of, 631; pathology of carcinoma of nasopharynx, 896; neurologic complications of malignant tumors of rhinopharynx, 1128; nasopharyngeal carcinoma in Chinese, 1129

Nutrition, And endemic goiter in Mexico, 151; body composition in postgastrectomy state, 1414

Obesity, Treatment of, in outpatient dietetic unit, 236

Obstetrics, Management of obstetric hemorrhage in United States, 440; total eclampsia statistics for 1957 to 1960 in 72 German obstetric hospitals, 681; in adolescents, 683; posttransfusional antierythrocyte, antileukocyte, and antiplatelet isoimmunization in gynecology and, 933; intestinal obstruction in, 934; maternal deaths in California, 1957–1962, 936; maternal mortality in Sweden, 936; multipara, 937; urography in, 1176; fetal electrocardiogram as diagnostic aid in, 1177

Osteogenesis imperfecta, In adult, 692

Osteomyelitis, Various courses of antibiotic, 209; treatment of acute and chronic, 209; treatment of synovitis of hip and, in infants with antibiotics and sulfonamides, 213; osteoarticular deformities from, 691; maxillary, in infant, 895; primary closure after operative treatment of gross chronic, 945; of femur after intramedullary nailing, 952; changes in course of, in babies since introduction of antibiotic therapy, 1187

Ovary, Etiology, pathogenesis, and treatment of Stein-Leventhal syndrome, 194; preoperative diagnosis of vascular accidents of, 435; ruptured adnexal abscess with generalized peritonitis, 435; multicystic, 1393; duration of fertility following wedge resection of, for Stein-Leventhal syndrome, 1393

Ovary, neoplasms, Cancer of, 193; inflammatory adnexal tumors, 194; unilateral and bilateral location of tumors of, 932

Oxygen, Treatment of cerebral gas embolism in high pressure chamber, 157; treatment of anaerobic infections with hyperbaric, 228; measurement of factors impairing gas exchange in man with hyperbaric pressure, 469; surgery under hyperbaric oxygenation in infants with congenital cardiac disease, 711; hyperbaric, in hemorrhagic shock, 719; administration of, under increased pressure in cases of low cardiac output caused by injection of microspheres of divinylbenzene into coronary arteries, 910; large chamber for hyperbaric oxygenation, 1204; head tent for hypoxia, 1210; treatment of tetanus by hyperbaric oxygenation, 1416

Palate, Cleft, 163; cleft lip and, 164; neonatal orthopedic correction for cleft lip and, 164; prevention of maxillary collapse in congenital cleft lip and, 164; maxillary orthopedics and anterior repair of, with bone grafting, 165; longitudinal study of ear disease and hearing loss in patients with cleft lip and, 392; presurgical orthopedics and bone grafting for infants with cleft lip and, 642; management of cleft lip and, in United States and Canada, 905; anesthetic management for surgery of cleft lip and, 1210

Pancreas, Pseudocysts of, in infancy and childhood, 189; prevention of ulcer after surgery of, 189; splenoportogram in chronic diseases of, 233; Zollinger-Ellison syndrome treated without gastric surgery, 928; demonstration of, on roentgenogram, 973; biopsies of, 1172; annular, 1172; total pancreatectomy, 1173; pancreatoduodenectomy, 1382; new method for roentgenologic opacification of, 1389; pseudocysts of, 1390

Pancreas, neoplasms, Carcinoma of ampulla of Vater, 431; pancreaticoduodenectomy for periampullary carcinoma, 432; metastasizing islet cell tumor of, associated with hypoglycemia and carcinoid syndrome, 1173; surgical treatment of carcinoma of, 1173; surgical consideration in management of ulcerogenic tumors of duodenum and, 1382

Pancreatitis, Prevention of fatal, 189; current medical therapy of, 431; pancreatic cyst formation in chronic, 431; acute hemorrhagic and necrotizing, 673; treatment of acute, with adrenocorticosteroids, 673; antienzymes in acute experimental, 673; role of pancreatic enzymes in pathogenesis of acute, 927; acute, and complications, 927; acute, 1172; operative indications in diffuse chronic, 1389

Paralysis, Palliative surgical treatment of facial, 1140

Paraplegia, Bladder dysfunction in nontraumatic, 689; management of patients with traumatic, 902; closure of decubiti in, 1140

Parathyroid glands, Calcium kinetics in osteopenia and disease of, 394; hyperparathyroidism as cause of nephrolithiasis, 635

Parkinson's syndrome, Parkinsonism produced by parasagittal meningiomas, 639; surgical treatment of, 1138

Penis, Epidermoid carcinoma of, 199; total reconstruction of penile urethra following gunshot wound, 199; hypospadias, 443; amebic balanitis, 443; cure of priapism by cavernospongiosal anastomosis, 686; effect of roentgenotherapy on patients with Peyronie's disease, 939; artificial os, 1401

Peptic ulcer, Interim report on results on gastric freezing for, 183; individualization in diagnosis and therapy of gastric, 184; etiologic factors influencing operative mortality after vagotomy and antrectomy for duodenal, 184; surgical treatment of, 184; comparison of combined operation and Billroth I gastrectomy in

treatment of chronic duodenal, 185; medical management of gastric, 419; rationale and results of gastric freezing for, 419; stasis gastric ulcer with duodenal ulcer, 419; relationship between gastric secretion, body build, and, 420; of stomach in aged and calcified atherosclerosis, 420; appraisal of various operations for, 420; pyloroplasty associated with vagotomy in treatment of duodenal, 421; controlled trial of vagotomy and gastroenterostomy, vagotomy and antrectomy, and subtotal gastrectomy in elective treatment of duodenal, 421; effects of upper gastrointestinal surgery on blood formation and bone metabolism, 421; vagotomy in treatment of gastrojejunal ulceration after adequate partial gastrectomy, 663; gastric freezing for, in man, 664; gastric freezing for duodenal, 664; gastric freezing for, 918; obstructing gastroduodenal, 918; acute perforation of duodenal and gastric, 918; experience with Billroth I gastrectomy for chronic gastric, 918; surgical treatment of acute perforated, in free peritoneal cavity, 919; elimination of routine use of gastric decompression following operation for gastroduodenal, 919; chronic gastric, 1156; of stomach, 1156; familial multiple endocrine adenoma and, 1157; primary obliterating arteritis and gastric, 1157; gastric carcinoma and surgical treatment of gastric, 1159; gastric freezing for treatment of duodenal, 1380; massively bleeding gastroduodenal, 1380; vagotomy in treatment of perforated duodenal, 1381; vagotomy and pyloroplasty for gastric, 1381

Pericardium, Tuberculosis of, 176; uremic pericarditis with cardiac tamponade, 414; surgical management of acute pericarditis, 656; postoperative pericardial hernia, 1150

Peritoneum, Needle biopsy of, 179; peritoneoscopy as aid in diagnosis of acute abdominal conditions, 1379

Peritonitis, Starch, 659; spontaneous, and bacteremia in Laennec's cirrhosis caused by enteric organisms, 915; peritoneal lavage in postoperative therapy of late peritoneal sepsis, 1153; peritoneal lavage for generalized, 1153

Pharynx, neoplasms, Critical surgical problems in treatment of oral and laryngopharyngeal cancer, 393; treatment of advanced cancer of laryngopharynx, 636; pathology of carcinoma of nasopharynx, 896; neurologic complications of malignant tumors of rhinopharynx, 1128; nasopharyngeal carcinoma in Chinese, 1129; value of early case-finding in study of cancer, 1362

Physiologic research, Thrombolysin to dissolve blood clot placed within pleural space of dogs, 172; hemodynamics of peripheral vascular response in experimental dumping syndrome, 181; gastric acid secretion before and after hypophysectomy in man, 235; relationships of heart rate to circulation during hemorrhagic shock, 236; gastric blood flow and inhibition of histamine-stimulated gastric secretion, 418; measurement of factors impairing gas exchange in man with hyperbaric pressure, 469; insulin induced micromelia in chickens, 469; corticosteroid concentration in plasma during anesthesia and at operation, 469; hyperbaric oxygen in hemorrhagic shock, 719; protein turnover in ovarian neoplasms, estimated by T-1824 method, 719; toxicity of fluid from experimentally strangulated intestinal loops in rat, 1161; juxtaepiphysial vessels in long bones of fetal rats, 1215; congenital universal insensitivity to pain, 1423; hemorrhage without hypotension, 1424

Pineal body, Pathologic study of tumors of, 159; surgical removal of teratoma in region of, 1136

Pituitary, Gastric acid secretion before and after hypophysectomy in man, 235; attempted total hypophysectomy in advanced breast cancer, 398; hypopituitary coma in Sheehan's syndrome, 441; hypophysectomy for treatment of diabetic retinopathy, 639; postpartum insufficiency of, 937; radiologic signs in long term management of treated chromophobe adenomas of, 1136; hypophysectomy in general medicine and surgery, 1136; intrahypophysial implantation of radioactive yttrium for treatment of advanced breast cancer, 1136; stereotactic localization, 1137

Placenta, Some clinical aspects of insufficiency of, and urinary excretion of estriol, 194; placenta previa and low implantation of, 438; localization of, using RISA, 679; in anti-Rh isoimmunization, 1179; lesion of, to account for fetal hemorrhage into maternal circulation, 1180

Pleura, Apparently primary tumors of, 909

Polycythemia vera, 219

Polyps, Surgical management of multiple polyposis, 186

Portal vein, Celiac and superior mesenteric angiography in portal hypertension, 187; prophylactic portacaval shunt surgery, 187; portography in portal hypertension, 233; intrahepatic pressure as index of portal pressure, 427; immediate factors precipitating rupture of varices of, 666; control of fibrinolysis during portacaval shunts, 671; laterolateral mesentericocaval anastomosis, 703; prognosis after surgical treatment of ascites, 1386

Pregnancy, Successful, after radiation therapy for carcinoma of cervix, 193; some clinical aspects of placental insufficiency and urinary excretion of estriol, 194; transaminase determination in normal and abnormal, 195; ectopic, 195; abdominal, 195; appendicular inflammation and gravidopuerperal state, 196; accuracy of immunologic test for diagnosis of, 436; reliability of fetal electrocardiography using the abdominal recording technique, 436; studies of inferior vena cava in late, 436; interstitial, 436; fallopian tubes in, 436; heart disease in, 436; acute appendicitis in, 437; kyphoscoliosis complicating, 437; methyldopa in treatment of severe toxemia of, 437; rupture of unscarred uterus, 437; experimental study of amniotic embolism, 438; hydramniotic, with fetal malformations, 439; carcinoma of breast and, 644; blood volume studies in normal, toxemia, and gynecologic patients, 678; spontaneous intraperitoneal hemorrhage during, 679; cause and treatment of oblique transverse and unstable lie of fetus with particular reference to antenatal care, 680; treatment of invasive carcinoma of cervix during, 680; congenital anomalies probably induced by cyclophosphamide, 681; eclampsia statistics, 681; etiopathogenesis of extrauterine, 682; associated colposcopic and colpocytologic examination in early diagnosis of carcinoma of cervix in, 930; prematurity, perinatal mortality, and maternal heart volume, 932; carcinoma of cervix uteri during, 934; prolonged, 934; perioral halo as new clinical sign in diagnosis of extrauterine, 935; full term abdominal, 935; immunologic test for, 1176; prediabetes and, and their repercussions on maternal and fetal prognosis, 1177; new data on actomyosin of pregnant human uterus, 1177; prophylactic and therapeutic use of bendroflumethiazide in, 1177; appendicitis and, 1177; hiatus hernia in, 1178; bacteriuria in, 1178; aplastic anemia in, 1178; cancer in, 1178; uterine rupture during, 1179; influence of early admission on fetal survival in twin, 1179; thyroid function in, 1394; pulmonary function during, 1394; effects of increasing parity on myometrium, 1394; following cardiac surgery, 1395; antiepileptic medication during, 1395; spontaneous rupture of liver in, 1395; treatment of eclampsia, 1396; obstetric aspects of some infections with listeriosis, 1396; results of studies on infectious mononucleosis with consideration of intracutaneous diagnosis, 1396

Prostate gland, Histochemistry of normal hyperplastic and neoplastic human, 199; granulomatous prostatitis, 199; disorders of coagulation associated with surgery of, 443; pelvic angiography in disease of, 685; thromboembolic complications in surgery of, 685; trends in surgery of, 685; pathogenesis and prevention of thromboembolic accidents following prostatectomy, 707; radiographic estimation of size of, 939; experimental cryosurgery of, 939; diagnostic and therapeutic approach to abscess of, 1183; bloodless prostatectomy, 1183; dilatation of, 1400; 300 prostatectomies, 1400

Prostate gland, neoplasms, Endocrine therapy plus radical perineal prostatectomy in treatment of advanced carcinoma of, 199; leiomyoma of, 685; tartrate inhibited acid phosphatase in benign hypertrophy and cancer of, 939; allergic granulomas of, in asthmatics, 1183

Prosthesis, Origin and present status of maxillofacial, 147; and autogenous dermal grafts, 162; pneumatically driven sac type of intrathoracic artificial heart, 655; importance of porosity in arterial, 702; simplified method for construction of facial, 905; early and late results of partial and total replacement of the aortic valve with individual teflon cusps, 911; mandibular joint arthrosis corrected by insertion of cast-vitallium glenoid fossa, 946; teflon and pericardial aortic valve, 1149; lower extremity amputation and appropriate, 1193; fabric vascular, 1195; management of aortoiliac reconstruction complicated by sepsis and hemorrhage, 1197

Psychosurgery, Orbital cortex as objective in surgical treatment of mental illness, 395

Psychotherapy, Evaluation of effectiveness of, in treatment of ulcerative colitis, 924

Puerperium, Hypopituitary coma in Sheehan's syndrome, 441; microbiologic investigations concerning stability of chloramphenicol in breast milk, 683; postpartum pituitary insufficiency, 937; pelvic kidney and postnatal considerations, 1182

Purpura, Hepatic, and splenic plasmosarcomatosis, 1168

Pylorus, Infantile stenosis of, 183; tit in hypertrophic stenosis of, 233; distribution of mucosa of, in partial gastrectomy specimens, 422; congenital stenosis of, 1160

RADIATION, Whole body, in man as preliminary to renal transplantation, 204; treatment of acute local injuries due to, 234; recovery of male fertility after sterilization by nuclear, 444; thyroid carcinoma induced by, 718; diagnosis, treatment, and prognosis of human injury from whole body, 718; treatment of acute injury in man from whole body, 718; fate of woman castrated by, 932; damage of spinal cord due to, 974; effects of ionizing, and chemotherapeutic agents on human chromosomes, 974; myelopathy due to, 1213; comparison of effect of microsecond and nanosecond ruby laser, on rat tissues and mouse melanoma, 1215; cytologic response to, in cervical cancer, 1392

Radioactivity, Scintillation scanning of brain tumors, 157; test for patency of ventriculovascular shunt for hydrocephalus with RISA, 158; radioisotopic renal function studies and surgical findings in hypertension, 201; radioactive I^{131} and P^{32} as aids in diagnosis of lesions of stomach, 418; diagnosis of bone metastasis by photoscanning with strontium-85; 449; studies on peripheral blood and lymph flow utilizing, 459; isotopic identification of strangulation obstruction, 667; placenta localization using RISA, 679; diagnosis of renal tumors with, 718; chronic synovial effusions treated with intra-articular radioactive gold, 953; clinical comparison of 2 agents used in brain scanning, 1134; intrahypophysial implantation of radioactive yttrium for treatment of advanced breast cancer, 1136; radon and radioactive seed volume implants for extensive recurrent vaginal-pelvic cancer, 1176; radioactive iodine and surgery of thyroid, 1363; studies of weight loss in patients after gastrectomy using, 1383; prognostic assessment in fractured femoral neck by, 1408; studies of vascularization of healing wounds with, 1414; diagnosis of liver metastases by measurement of liver activity after rectal radioiodine application, 1420; radioactive fibrinogen for diagnosis of tumors, 1422

Radiotherapy, Results obtained with, in malignant tumors of tonsil, 150; value of, in management of osteoclastoma, 207; place of, in treatment of hypernephroma, 234; complications in postoperative, of mammary carcinoma, 404; of cancer of rectum and rectosigmoid, 426; complications following, in carcinoma of cervix and their treatment, 434; radical cystectomy after supervoltage, 447; osteoradionecrosis of skull, 449; place of, in management of early breast cancer, 645; assessment of radical mastectomy and postoperative, in treatment of mammary cancer, 645; results of combined surgical treatment and, of 598 breast carcinomas, 645; rapid palliative, of inoperable breast cancer, 645; preoperative, of bronchogenic carcinoma, 650; and lung cancer, 650; immunologic method of increasing sensitivity of primary sarcomas to local irradiation with roentgen rays, 717; surgery and, of carcinoma of uterine cervix, 931; and excision of lymph nodes in cervical cancer, 931; effect of, on patients with Peyronie's disease, 939; current status of, in carcinoma laryngis, 1131; preoperative, in bronchogenic carcinoma, 1147; combined use of AB-132 and x-irradiation in management of advanced bronchogenic carcinoma, 1147; cobalt-60 teletherapy for carcinoma of esophagus, 1152; bowel obstruction after pelvic and abdominal, 1161; assessment of response of cervical cancers to, by routine histologic methods, 1175; presurgical, in bronchogenic carcinoma of superior sulcus type, 1213; sequelae of radical, of carcinoma of lung, 1213; hybaroxic, in cancer management, 1214; urologic complications in surgical treatment and, of carcinoma of uterine cervix, 1214; stromal interference in radioresponse of squamous cell carcinoma of oral cavity, 1421; increase in number of 5 year cures by use of antibiotic prophylaxis in, of carcinoma of uterine cervix, 1422

Radius, Excision in fractures of head of, 449

Rectum, Control of precancerous conditions of colon and, 425; nonoperative treatment of internal hemorrhoids, 426; successful surgical treatment of complete prolapse of, 426; proctologic lesions observed in male homosexuals, 427; perineoabdominal amputation of, 925; variety of rectourethral fistulas, 944; treatment of perforations of, 1166

Rectum, neoplasms, Some prognostic factors for carcinomas of colon and, 187; irradiation of cancer of rectosigmoid and, 426; surgical treatment of cancer of, 924; palliative resection for primary cancer of colon and, complicated by liver and lung metastasis, 1165; carcinoid tumors of, 1167, 1167

Respiration, Problems in management of intermittent positive pressure, in newborn, 441; pneumothorax and pneumomediastinum in newborn, 441; respiratory problems in immediate postoperative period, 461; effect of general anesthesia on, 713; prevention and treatment of postoperative respiratory insufficiency by respiratory assistance without tracheostomy, 1204; effect of morphine on breathing pattern, 1204; respiratory and circulatory function of patients with bronchogenic carcinoma, 1373; pulmonary function during pregnancy, 1394; management of pulmonary insufficiency during surgery, 1413

Rickets, Craniosynostosis in rachitic spectrum, 210
Roentgen rays, diagnosis, Hazards of diagnostic radiology in pediatrics, 231; new contrast medium for subarachnoid myelography, 231; criteria for diagnosis of submucosal gastric lipoma, 233; method of following changes and displacements of brain after surgery, 395; mammography, 403; demonstration of esophagus including morphologic and functional factors, 414; roentgenography of heart and great vessels, 467; technique and possibilities of phlebography of leg, 467; water soluble, viscosized water soluble, and oily iodine contrast materials in hysterosalpingography, 468; operative contrast visualization, 468; diagnosis of carcinoma of breast, 643; value of contrast medium injection in locating lesions of breast causing discharge, 643; hysterosalpingography, 675; pelvic angiography in disease of prostate gland, 685; genitography in intersexual states, 690; pulmonary angiography in diagnosis of thromboembolic disease, 701; lymphangiography for malignant diseases in children, 706; role of sialography in diagnosis and therapy of chronic obstructive sialadenitis, 715; anatomicoroentgenographic study of thoracic duct, 715; vascular gaps in roentgenography of pulmonary embolism, 715; lymphangioadenography, 716; practical long-film serialography, 716; combined search for abdominal metastases with scintography of lymphatic system and cavography, 716; "complete" femoral head and hip roentgenography, 717; arteriography in diagnosis of subdural hematoma, 904; diagnosis of intussusception in children, 923; estimation of size of prostate, 939; fallacy of cervical discography, 947; vascular markings in region of frontal sinuses, 971; roentgenocinematographic studies of human thoracic duct, 972; findings in chronic gastritis, 973; demonstration of pancreas on roentgenogram, 973; value of lymphography in search for metastases, 973; roentgenologic aspects of cervix following segmentary cesarean section, 1175; urography in obstetrics, 1176; lymphangiographic criteria for diagnosis of retroperitoneal fibrosis, 1201; orbital tomography with injection of air and iodic hydrosoluble contrast substance, 1211; iodoventriculography in tumors of posterior fossa, 1211; diagnosis of expansion process of moderate volume in region of trigone, 1211; choice of contrast medium in double contrast studies of bladder, 1212; drip infusion pyelography, 1212; portable television image intensification system in urologic roentgen diagnosis, 1212; safe routine peripheral angiography in large city hospital, 1213; iodoventriculography by direct catheterization of third ventricle in posterior fossa lesions of childhood, 1364; roentgenologic opacification of pancreas, 1389; diagnosis of tumors of seminal vesicles and cystic formations of lower genitourinary tract of man, 1400; vertebral angiography by percutaneous puncture of axillary artery, 1419; vertebral arteriograms performed by subclavian subclavicular route, 1419; new cardiovascular contrast media, 1419; renal angiography in hypertension, 1420; percutaneous noncatheter left brachial renal arteriography, 1420; comparative postmortem examinations in liver angiography, 1421

Salivary glands, Treatment of acute postoperative parotitis, 151; anatomicoclinical experience with acute postoperative, suppurative inflammatory processes of, 632; sialography in diagnosis and therapy of chronic obstructive sialadenitis, 715
Salivary glands, neoplasms, Malignant tumors of parotid, 151; tumors of, 633; benign parotid tumors, 896; management of tumors of parotid, 897; hemangioma of parotid, 897; pleomorphic adenomas of, 1362
Sarcoidosis, Mediastinal and mediastinopulmonary form of, 416
Sarcoma, Clinical and therapeutic aspects of tonsillar reticulosarcoma, 150; osteogenic, 692; osteosarcoma, 946; rhabdomyosarcoma of head and neck in children, 1363
Scalp, Malignant tumors of, 147, 161
Scapula, Fractures of, 694
Shock, Relationships of heart rate to circulation during hemorrhagic, 236; caused by gram-negative microorganisms, 462; circulatory effects of angiotensin, levarterenol, and metaraminol in treatment of, 472; endotoxic, with septic abortion, 676; use of hyperbaric oxygen in hemorrhagic, 719; septic, 719; causes of, with head injury, 900; fluid therapy in hemorrhagic, 963; usage of dibenzyline in clinical, 1424; comparative effects of blood, saline, and low molecular dextran on irreversible hemorrhagic, 1424
Shoulder, Painful, 694; tears of humeral rotator cuff, 948
Sigmoid, Volvulus of, in children, 426
Sinuses, Vascular markings in region of frontal, 971; osteoplastic approach to frontal, for osteoma, 1127
Skin, Prostheses and autogenous dermal grafts, 162; healing of incisional wounds in rats, 226; appraisal of, antiseptics and attempted correlation with wound infection, 228; low molecular weight dextran in ischemic ulceration of, 455; treatment of keloids by steroids with biochemical tests for diagnosis and prognosis, 1139
Skin, neoplasms, Treatment of squamous cell carcinoma of, by electrodesiccation and curettage, 161; treatment of multiple cutaneous carcinomas of face by Mohs's chemosurgery method, 161; treatment of basal cell carcinoma, 401; multiple nevoid basal cell epitheliomas, jaw cysts, and skeletal defects, 401; treatment of cancer of, 641; malignant melanoma, 1139
Skull, Osteoradionecrosis of, 449
Snakebite, In Kentucky, 708; statistics on, in Texas, 1206
Speech, Intracarotid sodium amytal for lateralization of cerebral dominance of, 1133
Spinal cord, Natural history of spina bifida cystica, 159; new contrast medium for subarachnoid myelography, 231; cervical chordotomy by anterior approach, 398; biochemics of lumbosacral nerve roots, 398; surgical treatment of angiomas of, 399; diastematomyelia, 639; effect of anatomic variations in lumbar vertebrae and spinal canal on cauda equina and nerve root syndromes, 639; intermittent claudication from compression of cauda equina by narrowed spinal canal, 900; myelographic appearance of vascular anomalies of, 902; radiation damage of, 974; urinary tract and spina bifida cystica, 1138; urinary tract changes associated with spina bifida and myelomeningocele, 1138; radiation myelopathy, 1213
Spine, Influence of movements of, on lumbar intradiscal pressure and on tensile stresses in annulus fibrosus, 208; long term survival of patients with myeloma of vertebral column, 212; new contrast medium for subarachnoid myelography, 231; differential diagnosis of injuries of, in children, 232; treatment of scoliosis, 450; functional disturbances in lumbar, 450; fractures and dislocations involving cervical roots but sparing cord, 694; traumatic lesions of, in children, 695; disc infections and abdominal pain, 695; back injuries and status of intervertebral disc, 695; following rotatory manipulation in lumbar intervertebral-disc syndrome, 696; continuous spinal drainage in treatment of postoperative cerebrospinal fluid fistulas, 901; primary intraspinal tumors, 902; follow-up after operation for herniated nucleus pulposus, 902; tuberculous spondylitis of first 2 cervical vertebrae, 946; aspiration biopsy of cervical, 946; fallacy of cervical

discography, 947; fractures and subluxations of cervical vertebrae which spare cord, 947; discitis, 948; variants of displacement phenomenon in cervical and lumbar, 972; displacement and locking in cervical and lumbar, 1188; collapsing, 1407

Spleen, Splenectomy in leukemia and lymphoma, 190; treatment of thrombocytopenic idiopathic purpura, 190; percutaneous splenic venography under roentgen television control, 928; splenectomy in myelofibrosis, 928; indications for splenectomy and results in hematologic disorders, 1173

Stereotaxis, Localization of deep cerebral structures with local cooling during stereotactic procedures on human, 901; new approach to localization for, 1137; chronic stereotactic implantation of depth electrodes for psychomotor epilepsy, 1137; transsphenoidal cryohypophysectomy, 1137; combined stereotactic operation for treatment of deep-seated angiomas and aneurysms, 1137; cryohypophysectomy, 1137; surgical treatment of Parkinson's syndrome, 1138

Sterility, Insufflation in 200 cases of hydrosalpinx, 675

Steroids, Corticosteroid concentration in plasma during anesthesia and at operation, 469; animal experiments on epithelization of corneal erosions when using lysozyme or, 629; treatment of acute pancreatitis with adrenocorticosteroids, 673; biosynthesis of placental corticosteroids, 975; treatment of keloids by, with biochemical tests for diagnosis and prognosis, 1139; cortisone in palliative treatment of breast cancer, 1370

Stomach, Perforation of, in newborn, 183; individualization in diagnosis and therapy of ulcer of, 184; gastric acid secretion before and after hypophysectomy in man, 235; radioactive I^{131} and P^{32} as aids in diagnosis of lesions of, 418; blood flow and inhibition of histamine-stimulated secretion in, 418; pseudotumoral varices of, 419; clinical experience with gastrocamera, 661; use of dye for differentiating antrum from corpus, 661; long term effect of vagotomy on maximal acid response to histamine in man, 663; effects of freezing of, on vitamin B_{12} absorption, acid secretion, tissue morphology, and serum enzymes, 917; physiologic interpretation of freezing of, in human, 917; freezing of, for peptic ulcer, 918; marginal ulcer following partial or subtotal gastrectomy, 919; pantaloon anastomosis for dumping and similar symptoms following partial resection of, 920; roentgenographic findings in chronic gastritis, 973; suction biopsy study in chronic gastritis, 973; effects of freezing on isolated denervated gastric pouch in dogs, 1156; effects of freezing on mucosa of dogs, 1156; chronic ulcer of, 1156; ulcer of, 1156; primary obliterating arteritis and ulcer of, 1157; late results of resection of, 1157; roentgen diagnosis of melanoma of, 1158; perfusion of isolated canine, 1159

Stomach, neoplasms, Epidemiologic investigation of cancer of, 182; neurinomas of, 183; roentgen diagnosis of submucosal lipoma of, 233; exfoliative cytologic screening for cancer of, 422; association of epithelial hyperplasia and cancer of, 422; diagnostic laparotomy for suspected carcinoma of, 661; eosinophilic granuloma of, 916; dietary factors in carcinoma of, 920; long survival after carcinoma of, 921; roentgen diagnosis of melanoma of, 1158; tetracycline fluorescence in diagnosis of carcinoma of, 1158; anamnestic duration and period of survival in patients with cancer of, 1158; carcinoma of, 1159; carcinoma of, and surgical treatment of ulcer, 1159; tetracycline fluorescence test in neoplasms of, 1383; evaluation of tetracycline fluorescence test in diagnosis of cancer of, 1384; carcinoma of, 1384

Stroke, Medical management of cerebrovascular diseases, 220; endarterectomy in treatment of cerebrovascular disease, 220; rheoencephalography in control subjects and in proved cases of cerebrovascular disease, 395; intracranial hemorrhage following surgical revascularization for treatment of acute, 701

Surgery, Detection and correction of bleeding tendencies in surgical patient, 223; in patients between 80 and 100 years of age, 461; thoracotomy and laparotomy in infants and young children, 647; relation of coagulation factor defects to blood loss in, 1201; electrical hemostasis, 1202

Surgery, experimental, Coating and reinforcement of intracranial aneurysm with synthetic resins and rubbers, 156; prevention of ulcer after pancreatic, 189; survival of renal homotransplants in dogs treated by chemotherapy, radiation, and cross circulation, 204; long term functional and histologic fate of arteriotomy patches of autogenous and venous tissue, 219; prevention of experimental peritoneal adhesions by dextran, 417; arterial prosthesis of heterologous vascular origin, 457; bronchial stump closure in pulmonary resection, 650; homotransplantation of lungs with cytoxic agents, 651; free pleural grafts for bronchial stump closure, 1146; technique of tunneling of retrosternal space for retrosternal esophagoplasty, 1151; use of in vivo structured autologous and homologous fibrocollagenous tubes in abdominal aorta, 1198; techniques for full thickness keratoplasty in rabbits using fresh and frozen corneal tissue, 1359; autogenous veins as arterial substitutes, 1411

Surgery, plastic, Success of pharyngeal flap procedures, 150; nasal hump problem, 163; prolonged postoperative cervical pressure as adjunct to, on neck, 165; composite lip flaps and grafts in secondary cleft deformities, 402; muscle patterning factors in surgical correction of mandibular prognathism, 402; problem of root of nose in corrective rhinoplasties, 631; cleft lip repair by Millard's rotation-advancement method, 642; presurgical orthopedics and bone grafting for infants with cleft lip and palate, 642; use of temporal artery pedicle skin flaps in repair of facial burns and other deformities, 643; congenital absence of vagina treated by closed inlay skin graft technique, 678; operative and immediate postoperative complications and difficulties of vaginal, 678; construction of facial prostheses, 905; management of cleft lip and palate in United States and Canada, 905; value of pedicled rotation flaps in treatment of pigmented nevi in children, 906; augmentation mammaplasty using inframammary dermal fat grafts, 906; techniques and indications of circular lipectomy, 1139; palliative surgical treatment of facial paralysis, 1140; toe-to-hand transfers (pedochyrodactyloplasty), 1140; Berry-Treacher Collins syndrome, 1367; cervical skin flaps for intraoral and pharyngeal repair following cancer surgery, 1367; adhesive suture strip closure of wounds in, 1368; congenital partial absence of tarsal plates, 1368

Surgery, postoperative care, Silicone serosal interface, 179; role of drainage following biliary tract surgery, 188; normal fluid, electrolyte, and caloric requirements for children requiring parenteral alimentation, 225; postoperative fluid, electrolyte, and caloric requirements in children, 225; prevention of postoperative acute renal failure with mannitol, 225; postoperative gastrointestinal motility, 226; effects of upper gastrointestinal surgery on blood formation and bone metabolism, 421; nutrition after vagotomy and gastrojejunostomy, 422; reduction of postoperative pain by encouragement and instruction of patients, 707; elimination of routine use of gastric decompression following operation for gastroduodenal ulcer, 919; effect of alcohol on postoperative anti-

diuresis, 964; peritoneal lavage in postoperative therapy of late peritoneal sepsis, 1153; relation of d-pantothenyl alcohol therapy to resumption of intestinal function postoperatively, 1161; appendectomy wound infection, drainage, and antibiotics, 1163; use of heparin in, 1196; prevention and treatment of postoperative respiratory insufficiency by respiratory assistance without tracheostomy, 1204; effect of morphine on breathing pattern, 1204; clinical evaluation of d-pantothenyl alcohol in prevention of postoperative ileus, 1204; metabolic effects of mechanical ventilation and respiratory alkalosis in postoperative patients, 1413

Surgery, postoperative complications, Analysis of mortality and postoperative complications of esophageal resection for cancer, 177; systemic lupus erythematosus cirrhosis, and ulcerative colitis after thymectomy for myasthenia gravis, 178; complications after treatment of esophageal atresias, 180; etiologic factors influencing operative mortality after vagotomy and antrectomy for duodenal ulcer, 184; clinical and biochemical investigations of hepatic function after gastric resections, 185; percutaneous tracheal stimulation, 225; metabolic acidosis in general surgery, 225; complications of radical mastectomy, 404; complications in repair of coarctation of aorta, 411; retrograde intussusception of jejunum following gastric resection, 420; complications after duodenal, 420; immediate complications following appendectomy, 423; complications of biliary tract, 430; Berry operation for treatment of urinary incontinence in male patient, 447; respiratory problems in immediate postoperative period, 461; anesthesia and its immediate complications, 466; immediate complications of thoracotomy for heart disease, 655; starch peritonitis, 659; immediate complications of hernia, 660; intestinal obstruction during early postoperative period, 667; thromboembolic complications in prostate, 685; indwelling catheter and urinary tract infection, 690; prevention of thromboembolic phenomena following operations on neck of femur, 696; pathogenesis and prevention of thromboembolic accidents following prostatectomy, 707; postoperative hepatic necrosis, 712; marginal ulcer following partial or subtotal gastrectomy, 919; steatorrhea and diarrhea after vagotomy, 920; pantaloon anastomosis for dumping and similar symptoms following partial gastric resection, 920; postoperative tension pneumoperitoneum, 922; ureteral injuries in pelvic, for benign lesions, 943; effects of age and immobilization on incidence of thromboembolism, 964; changing values of infection in, 965; reanesthetizing patients undergoing adenoidectomy because of persistent postoperative hemorrhage, 967; thyroid carcinoma and problem of postoperative tetany, 1131; Henley's remedial operation for dumping syndrome, 1160; immediate complications of pneumonectomies, 1373; acute symptomatic postoperative hyponatremia, 1413

Surgery, preoperative care, Bleeding diatheses in surgical patients, 963; surgical bleeding in polycythemia vera, 1202; preoperative blood volume, 1204; prevention of surgical oliguria and renal-hemodynamic suppression by sustained hydration, 1205; prophylaxis and treatment of acute respiratory insufficiency during thoracic, in patients with impaired pulmonary function, 1372; management of patients with pulmonary insufficiency undergoing, 1413; management of blood volume in surgical patients, 1413; prophylaxis of surgical infection, 1415

Surgery, reconstructive, Use of tongue flaps in lower-lip reconstruction, 165; reconstruction of thumb by composite bone-skin flap, 165; reconstruction of thumb immediately after injury, 166; total reconstruction of penile urethra following gunshot wound, 199; antihelix reconstruction, 391; reconstruction of cervical trachea, 647; esophagoplastic operations with colon, 656; use of intestinal loop for reconstruction of bladder, 1405; reconstruction of anterior cruciate ligaments, 1408

Surgery, technique, Treatment of hiatus hernia by hiatus herniorrhaphy, vagotomy, and drainage procedure, 180; comparison of combined operation and Billroth I gastrectomy in treatment of chronic duodenal ulcer, 185; extensive abdominal operation for carcinoma of uterine cervix, 193; canthoplasty and brow elevation for facial palsy, 389; operation for hiatus hernia and cardioesophageal chalasia by fundoplication after Nissen, 418; appraisal of various operations for peptic ulcer, 420; controlled trial of vagotomy and gastroenterostomy, vagotomy and antrectomy, and subtotal gastrectomy in elective treatment of duodenal ulcer, 421; total hysterectomy with exposure of ureter, 433; cataract extraction with optimum wound closure, 630; microsurgery of peripheral nerves, 640; selective nerve section in prevention of postvagotomy diarrhea, 663; new surgical technique for Hirschsprung's disease, 668; hemihepatectomy and resection of liver, 670; hepaticojejunostomy and choledochojejunostomy, 670; hepaticojejunostomy with transhepatic intubation, 671; small vein anastomosis with and without operative microscope, 702; vertical vs. horizontal laparotomies, 915; "sliding roof" ureteral meatoplasty, 1185; left colon total bypass for benign and malignant disease of esophagus, 1376

Television, Portable image intensification system in urologic roentgen diagnosis, 1212; advances in surgery of bone by means of roentgen, 1213

Tendons, Submicroscopic investigations of healthy and degenerated, 217; ruptured achilles, treated by tenodesis with plantar gracilis, 218; stenosing tenosynovitis of thumb in children, 698; tuberculous tenosynovitis, 699; suture of Achilles, with fresh autoplastic and cold-preserved homoplastic plantaris muscle, 1410; cystic degeneration of, 1410

Test, For patency of ventriculovascular shunt for hydrocephalus with RISA, 158; accuracy of immunologic, for diagnosis of pregnancy, 436; with insulin, after vagotomy, 664; treatment of keloids by steroids with biochemic, for diagnosis and prognosis, 1139; tetracycline fluorescence in diagnosis of gastric carcinoma, 1158; immunologic, for pregnancy, 1176; new rapid, for pheochromocytoma, 1186; effect of povidone-iodine (bentadine) on serum protein bound iodine, when used as surgical preparation on intact skin, 1209; with tetracycline fluorescence in gastric neoplasms, 1383; evaluation of tetracycline fluorescence in diagnosis of gastric cancer, 1384; new diagnostic, for pheochromocytoma, 1406; penicilloyl-polylysine as intradermal, of penicillin sensitivity, 1416

Testis, Hernia, hydrocele, and undescended, 200; torsion of, 443; anatomic study of granulomatous orchitis, 1401

Testis, neoplasms, Classification and frequency of tumors of, 1183; relative malignancy of tumors of, 1184; bimodal distribution in accordance with age of individual of primary neoplasms of, 1402

Tetanus, Hemorrhagic complications during treatment of, 462; after 70, 710; current status of control of, 966; treatment of, by hyperbaric oxygenation, 1416

Thoracic duct, Roentgenocinematographic studies of human, 972; management of chylothorax, 1377

Thorax, Neoplastic osteolytic rib lesions, 167; causes of rib notching, 716; stricture of thoracic trachea following closed chest injuries, 907; primary thoracic hemangiopericytoma, 913; multiple rib fractures

caused by traffic accidents and their current treatment, 1143; regimen for early care of patient with crushed chest, 1143; long term results of surgical correction of pectus excavatum and sternal prominence, 1371

Thromboangiitis obliterans, 961

Thrombophlebitis, Method of managing superficial, 223; superiority of heparin over prothrombin depressants in treatment of, and its sequelae, 223; as an early sign of visceral cancer, 960; surgical treatment of deep, of leg, 961; fibrinolytic therapy of, 1200

Thrombosis, Experimental use of thrombolysin to dissolve blood clot placed within pleural space of dogs, 172; venous thrombectomy in treatment of fresh deep, 459; thrombolytic therapy, 460; thrombolytic therapy with streptokinase, 460; genesis and prophylaxis of distant, 701; survival and complications in surgically treated aortoiliac, 959; of renal vein in children, 1404

Thymus, Systemic lupus erythematosus cirrhosis, and ulcerative colitis after thymectomy for myasthenia gravis, 178; effect of thymectomy on skin-homograft survival in children, 402; respiratory failure after thymectomy for myasthenia gravis, 1377

Thyroid gland, Nutrition and endemic goiter in Mexico, 151; female genital carcinoma and disease of, 433; morphologic evidence of thyroiditis in myasthenia gravis, 472; thyrotoxicosis treated by surgery or iodine-131 with special reference to development of hypothyroidism, 633; systematics of diseases of, in clinical surgery, 633; sequestered nodular goiter, 634; surgery of, in area of low endemicity of goiter, 634; incidence of de Quervain's thyroiditis, 898; autoimmunization in disease of, 1129; clinical diagnosis of disease of, 1130; nontoxic goiter in males, 1130; radioactive iodine and surgery of, 1363; function of, in pregnancy, 1394

Thyroid gland, neoplasms, Therapeutic indications in nodular forms of carcinoma of, 131; nodular, and cancer of, 394; carcinoma of, and death, 634; radiation-induced carcinoma of, 718; toxic adenoma of, 898; cancer of, 1130; cervical metastases as first symptom of carcinoma of, 1130; carcinoma of, and problem of postoperative tetany, 1131; papillary carcinoma of, 1362

Tibia, Stress fractures of, in children, 215; delayed union and nonunion of fractures of shaft of, 453; articular fracture of proximal epiphysis of, 953; therapy of tibial plateau fractures, 954; treatment of infected nonunion of, 1192; treatment of compound fractures of, 1409

Tobacco, Reconsideration of some significant aspects of cigarette smoking-lung cancer controversy, 170; smoking in relation to mortality and morbidity, 975

Tongue, neoplasms, Treatment of carcinoma of mobile portion of, 149; cancer of, 392

Tonsil, Results of tonsillectomy and adenoidectomy, 150

Tonsil, neoplasms, Radiotherapy in malignant tumors of, 150; reticulosarcoma of, 150

Trachea, Tracheobronchial compression by congenital cardiovascular anomalies in children, 169; expiratory stenosis of large bronchi and, resulting from hypotonia of pars membranacea in obstructive emphysema, 405; reconstruction of cervical, 647; traumatic injuries of tracheobronchial tree, 647; stricture of thoracic, following closed chest injuries, 907; cysts of bronchus and, in infants and young children, 1144

Tracheostomy, Respiratory infection following, 167; and respiratory dead space in emphysema, 167; in surgical view, 898; useful but dangerous method, 1143; use and misuse of, 1144; in children, 1371

Transplantation, Whole body radiation in man as preliminary to renal, 204; survival of renal homotransplants in dogs treated by chemotherapy, radiation, and cross circulation, 204; renal homografts in patients with major donor-recipient blood group incompatibilities, 445; 24 hour kidney storage with report of successful canine autotransplant after total nephrectomy, 471; reversal of early graft rejection after renal heterotransplantation in man, 471; problems in renal homotransplantation, 471; experimental homotransplantation of lungs with cytoxic agents, 651; successful preservation of mouse thymuses by freezing, 720; simple kidney storage technique, 942; late results of homotransplantation of lungs in dogs, 977; behavior of blood vessels after experimental, of bone, 977; of heart in man, 1150; ethical problems in organ, 1217; studies in bone, 1217; clinical possibility of extremity, 1218

Trauma, Closed abdominal, 179; blunt abdominal, 179; total reconstruction of penile urethra following gunshot wound, 199; treatment of penetrating wounds of chest, 226; treatment of acute cerebrocranial, by intracarotid administration of penicillin, 396; bile duct injuries, 430; impaling and transfixation injuries to limbs, 454; management of latent effects of bony orbital, 629; experimental head, 637; injuries of tracheobronchial tree, 647; long term effects of football injury to knee, 697; head and neck injuries in high school football, 698; injury of superior mesenteric vessels secondary to nonpenetrating abdominal, 703; hypogastric artery ligation for uncontrollable hemorrhage in acute pelvic, 703; stricture of thoracic trachea following closed chest, 907; management of maxillofacial, 1127; multiple rib fractures caused by traffic accidents and their current treatment, 1143; early care of patient with crushed chest, 1143; primary definitive surgical treatment of multiple major, 1206; effect of "delayed emergency operation" on plastic reconstruction in open fractures of extremities, 1206; cancer and traumatism, 1216; face fractures in motor accidents, 1359; current treatment of acute thoracic injuries, 1372; hepatic resection for massive, 1386; hemobilia due to, 1388

Tuberculosis, Of pericardium, 176; treatment of organ, 463; incidence and management of stricture of urinary tract due to, 687; tuberculous tenosynovitis, 699; renal insufficiency and renal, 941, 942; tuberculous spondylitis of first 2 cervical vertebrae, 946

Tuberculosis, pulmonary, Lung tissue resection for, in Algerian children, 170; empyema and bronchopleural fistula following pneumonectomy for, 909; evaluation of extensive unilateral resections for, 1145

Twins, Morbidity and fetal mortality in twin pregnancy, 195; surgical separation of 2 pairs of craniopagus, 901; perinatal mortality in multiple gestations, 937; influence of early admission on fetal survival in twin pregnancy, 1179; intravenous injections of orasthin, tokofinal, or syntocinon mixed with cardiazol to accelerate delivery of, and relation of this type of delivery to uterine rupture, 1397

Ulcer, Low molecular weight dextran in ischemic, of skin, 455; ischemic, of leg, 708; closure of decubiti in paraplegics, 1140; simple tumid, of sigmoid colon, 1166; pathogenesis, morphology, clinical symptoms, prophylaxis, and therapy of decubiti, 1205; hip disarticulation in patients with paraplegia and survey of treatment of pressure sores and its complications, 1368; Curling's, 1383

Ulna, Centers of ossification in proximal joint of, 449

Ultrasound, Use of, in diagnosis of intracranial lesions, 395; fetal cephalometry by, 438; trials of some improved crystal vibrators for use in ultrasonic methods of gynecologic diagnosis, 1391

Ureter, Primary dilatation of, in adult, 204; return of

MAYO CLINIC LIBRARY

renal function after varying periods of occlusion of, 446; megaureter, 687; ureterocele of childhood, 688; injuries to, in pelvic surgery for benign lesions, 943; ureterocele, 943; primary tumors of, 943; surgical correction of ureteroileal strictures, 944; "sliding roof" ureteral meatoplasty, 1185; bilharzial, 1405; physiology of obstruction of, 1405

Urethra, Association of valves in posterior, with bladder neck obstruction, 206; epitheliomas of female, 944; variety of rectourethral fistulas, 944; urethrographic studies on posterior, 1186; kidney after traumatic rupture of posterior, 1404

Urinary tract, Specific gravity determination, 201; opportunistic fungal infections of, 204; interpretation of voiding pressure, 205; research on bacteria of group Proteus isolated in infections of, 228; urologic causes of enuresis in childhood, 446; ileocutaneous ureterostomy in children, 448; incidence and management of tuberculous strictures of, 687; results of treatment of ureteropelvic junction obstruction, 688; indwelling catheter and postoperative infection of, 690; newer antibacterial drugs in infections of, 944; and spina bifida cystica, 1138; changes in, associated with spina bifida and myelomeningocele, 1138; frequency and relation of bacteriuria in pregnancy to overt urinary infection, 1178; drip infusion pyelography, 1212; portable television image intensification system in urologic roentgen diagnosis, 1212.

Urinary tract, neoplasms, Tumors of lower, in children, 448; primary tumors of ureter, 943; epitheliomas of female urethra, 944

Urine, incontinence, Results of operations for stress incontinence, 447; Berry operation for treatment of, in male patient, 447; operations for stress, 689

Uterus, Clinical and pathologic study of conization-hysterectomy time interval, 192; management of hydatidiform mole, 192; total hysterectomy with exposure of ureter, 433; rupture of unscarred, 437; rupture of, 440; primary echinococcal cyst of, 675; hydatidiform moles, 675; treatment of hydatidiform mole, 675; vascularization of endometrial fold at site of implantation of impregnated ovum, 929; traumatic intrauterine adhesions, 929; unintentional removal of invasive epidermoid cervical carcinoma in total hysterectomy, 930; rupture of, during pregnancy, 1179; prolonged postpartum dysfunctional bleeding subsequent to prenatal therapy with parenteral potent progestogens, 1391; effects of increasing parity on myometrium, 1394; intravenous injections of orasthin, tokofinal, or syntocinon mixed with cardiazol to accelerate delivery and relation to rupture of, 1397

Uterus, cervix, See Cervix uteri

Uterus, neoplasms, Fibroma of, and genital prolapse, 192; arteriography of trophoblastic tumors, 192; adenocancroid or adenoacanthoma of, 192; surgical method for chorioepithelioma invading small pelvic cavity, 433; submucous myomas, 433; vaginal hysterectomy for carcinoma of fundus, 676; anatomic evaluation of cancers of neck of, treated by Wertheim operation with lymphadenectomy following curie-therapy, 929; reasons for patient participation and nonparticipation in mass survey for carcinoma of, 1391; carcinomatous infiltration into uterine body in carcinoma of cervix, 1391

Vagina, Pubertal vaginitis, 435; congenital absence of, treated by closed inlay skin graft technique, 678; Nickerson's medium in diagnosis of moniliasis of, 678; plastic surgery of, 678; salt-induced stenosis of, in Arabia, 683; agents currently used in management of vaginitis, 932

Vagina, neoplasms, Primary carcinoma of, 435; treatment of cancer of, 678

Vagotomy, Pyloroplasty associated with, in treatment of duodenal ulcers, 421; controlled trial of gastroenterostomy and, antrectomy and, and subtotal gastrectomy in elective treatment of duodenal ulcer, 421; aspects of nutrition after gastrojejunostomy and, 422; bowel habit after gastrojejunostomy and, 422; effects of, on biliary system, 429; long term effect of, on maximal acid response to histamine in man, 663; in treatment of gastrojejunal ulceration after adequate partial gastrectomy, 663; selective nerve section in prevention of postvagotomy diarrhea, 663; insulin test after, 664; steatorrhea and diarrhea after, 920; in treatment of perforated duodenal ulcer, 1381; and pyloroplasty for gastric ulcer, 1381

Varices, Electrofulguration: new surgical method for varicose veins, 222; pseudotumoral gastric, 419; azygography in gastrointestinal hemorrhage, 661; rupture of portal, 666; cineradiography of esophageal, 1151; treatment of uncontrollable hemorrhage from esophageal, by cardia transplantation, 1155

Veins, Electrofulguration: new surgical method for varicose, 222; method of managing superficial thrombophlebitis, 223; studies of inferior vena cava in late pregnancy, 436; superior vena cava syndrome treated by azygos vein-inferior vena cava anastomosis, 458; thrombectomy in treatment of fresh, deep thrombosis, 459; pitfalls in surgery of, 459; venous return from lower leg in health and in chronic insufficiency of, 459; technique and possibilities of phlebography of leg, 467; malformations and tumors of neck, 641; anastomosis of small, with and without operative microscope, 702; surgical treatment of superficial and deep phlebitis of lower limbs, 704; autografts of, in femoropopliteal arterioplasty, 1199; vena cava plication, 1199; transcardial suction biopsy in occlusion of superior vena cava, 1411; dilatation of azygos, and superior vena cava with aplasia or occlusion of inferior vena cava, 1420

Vertebra, Atlantoaxial dislocation as frequent complication of chronic rheumatoid arthritis, 212

Volvulus, Of sigmoid in children, 426

Vulva, neoplasms, Simple vulvectomy and vulvectomy associated with inguinal lymphadenectomy in carcinoma of, 677; cancer of, 677; treatment of carcinoma of, by surgery and betatron, 1394

Wounds, Healing of incisional, in rats, 226; of fingers in infants, 402; acceleration of healing of, by parenteral injection of saline extract of cartilage, 461; healing of incisions closed with surgical adhesive tape, 462; infection and healing in superficial, 964; three-phase evaluation of pulsed, high-frequency, radio short waves, 965; dirt in, 1141; effect of deuterium oxide on healing of, collagen and metabolism of rats, 1206; studies of vascularization of healing, with radioisotopes, 1414; of liver, spleen, and kidney, 1414; thin skin healing, 1415

Wrist, Effect of anatomic variations on incidence of chronic injuries of joint of, 211; pathomechanics of fracture of carpal navicular, 211; ulnar lengthening as treatment of choice in Kienbock's necrosis of carpal lunate, 212; lunate and perilunar dislocations, 949; primary and secondary dislocation of scaphoid bone, 950; effect upon inferior radioulnar joint of excision of head of radius in adults, 950
